PREFACE

The West Virginia Economic-Statistical Profile - 1987 is the second edition of the Profile published by the West Virginia Chamber of Commerce. Selected data are presented for the state of West Virginia and its 55 counties; the United States and each of the 50 states; and comparisons between West Virginia and selected states.

West Virginia Rankings is of special interest to planners, decision makers and others charged with writing or speaking about the state of West Virginia. The data provide a means of comparison of West Virginia and other Southeastern states and with the the nation in many areas of interest.

Federal, state and private publications were used in compiling this edition and source documentation has been made as complete as possible.

Due to budget cuts, the printing of many federal publications has been discontinued, and unless organizations such as the West Virginia Chamber of Commerce continue to compile and print statistical information, much valuable data used by the public and private simply will not be available.

To encourage wide use of the Profile, the price of the 1987 edition has been kept as low as possible.

Compiling the 1987 Profile was a challenging task that required a variety of talents ranging from statistical research work to sophisticated word processing skills to editorial judgment. Each State Chamber staff member spent countless hours in an attempt to ensure that the Profile is as useful and up-to-date as possible. The list of those contributing to the 1987 Profile may be found on page iii. We are grateful for their dedication, patience and cooperation.

Federal and state personnel, too numerous to list individually, have been generous in providing vital data and information. A special note of appreciation goes to Kerri Petry of the West Virginia Tax Department for her contribution.

Population 599
Taxes 611
Miscellaneous 729

Notes For Users Of The Profile

The West Virginia Economic-Statistical Profile - 1987 attempts to provide, in a single reference source, the most useful and up-to-date data as well as some historical time-series data. Every effort was made to ensure the accuracy of reproduction and computations.

Detailed and specialized methodology for all data could not be included in the Profile, but the source notes at the end of each table have been provided for this reason. Indeed, much of the value of the Profile lies in its numerous references to other sources of valuable information and publications.

As new data were gathered, or as new information was requested, they were incorporated in the Profile. For example, extensive data on the forestry industry were included in this edition of the Profile because of the great potential of the forestry and wood products industries in our state. Concerns about pollution and the environment by both citizens and businesses provided the rationale for inclusion of pollution abatement data in the 1987 Profile.

We solicit your suggestions about other sources of data that should be included in future editions of the Profile.

DATA DEFINITIONS

*Displaced is an estimate of the number of women in the population who are displaced homemakers based on a definition developed by the ETA-Women's Bureau Task Force on Displaced Homemakers.

Economically Disadvantaged is an estimate of the number of women in the population who are both economically disadvantaged and displaced homemakers.

INDUSTRY SIZE AND ECONOMIC PERFORMANCE ACCORDING TO THE U.S. CENSUS OF MANUFACTURES

The 1982 Census of Manufactures reported 436 wood product establishments operating in West Virginia. They employed 6,400 people and had an annual payroll of $76.6 million. In 1982, the state's wood industries shipped an estimated $381.8 million worth of products, while adding $160.4 million in value through manufacture (Table 2).

West Virginia's primary wood industry segment produced $183.7 million in value of shipments in 1982, according to the Census of Manufactures estimate. The 355 primary wood industry establishments listed in the Census purchased $109.2 million worth of materials and added an estimated $74.5 million in value through manufacture. These establishments employed about 3,700 workers and paid $38.8 million in wages and salaries.[2]

The secondary segment of the state's wood industry consisted of 81 firms which employed approximately 2,700 workers and had an annual payroll of $37.8 million in 1982. These firms shipped $198.1 million worth of solid wood and paper products while adding $84.2 million through manufacture.[3]

The US Census data can be put in context by comparing it with other selected manufacturing activities within the state. Ranked among all West Virginia manufacturing industries in 1982, the wood products industry was fifth in employment and seventh in annual payroll and value added (Figure 2). It accounted for 6.6 percent of all manufacturing employment and 3.8 percent of all manufacturing payrolls.

Statistics for that same year, however, show that the wood products industry represented less than 1 percent of the state's total working labor force and that wood industry payrolls accounted for less than 0.5 percent of West Virginia's personal incomes [18].

At first glance, the contribution of West Virginia's forest-based industries appears to be modest at best. In some counties, however, wood-based industries are an important part of the economy. For example, wood processing represents nearly all manufacturing in Webster County, is of notable importance in Randolph, Braxton, Preston, and Greenbrier counties, and is of modest significance in Kanawha, Mercer, Upshur, and Wayne counties. Economic activity for these nine counties in 1981 is given in Table 3. In four of them more than 250 people were employed in the lumber and wood products industry alone (S.I.C. 24). In the nine counties together, lumber and wood

---

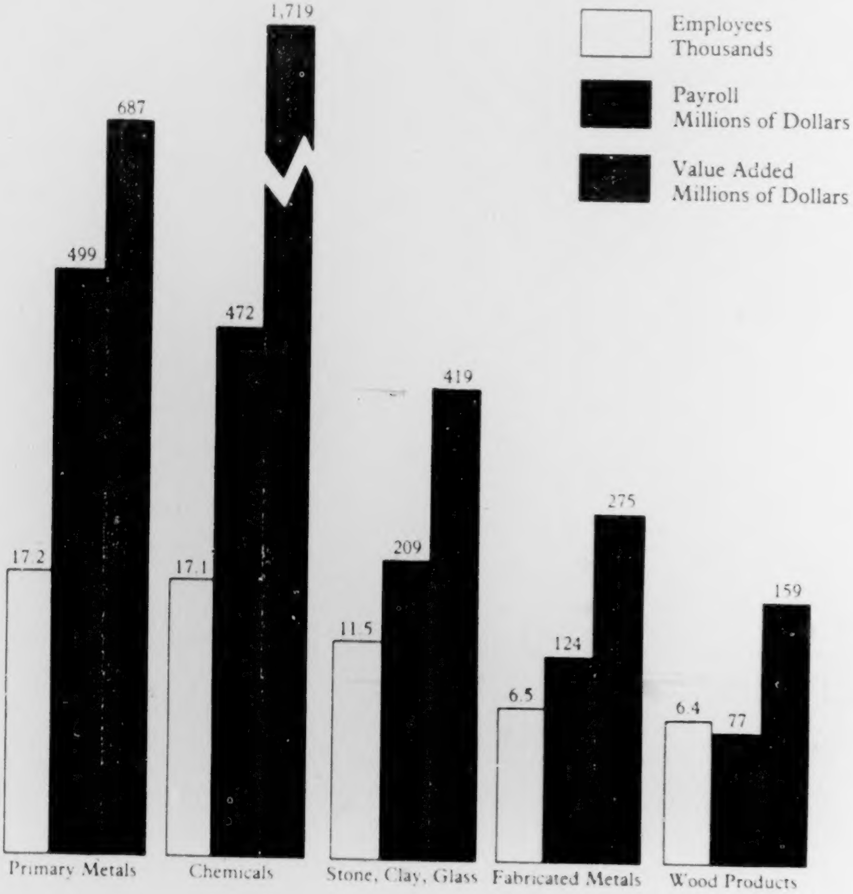
[2] Values do not include the contribution of the state's two veneer mills nor the state's two paperboard mills. Values for these industries could not be separated and are included in statistics for the secondary industry segment.

[3] The 81 firms reported in the census figures for the secondary wood industry include those firms in the furniture and fixtures industry (S.I.C. 25) which use non-wood materials as their principal input. Because of the nature of the census data, these firms could not be separated.

Industry Size and Economic Performance, continued

products accounted for almost 10 percent of manufacturing employment, 5.8 percent of annual payroll, and 31.8 percent of manufacturing establishments

Comparison of the wood industry with other major manufacturing industries in West Virginia, by employment, payroll, and value added, 1982.



Source: West Virginia University, Agricultural and Foresty Experiment Station, "Forests: The West Virginia Economy," Bulletin 691, Volume 4, April 1986.

INDUSTRY SIZE AND ECONOMIC PERFORMANCE ACCORDING TO OTHER SOURCES

Apart from the census data, available information on West Virginia's wood products industry is very general and scattered among several sources. A recent survey, conducted by Edward Murriner of West Virginia's Department of Agriculture, gives some information for the year 1981 and is shown below.

According to Murriner, more than 16,700 workers were employed in the state's wood products industry and were paid $135 million dollars in wages and salaries in 1981. The 1,098 wood product establishments had annual sales totaling more than $484 million [19].

Number of establishments, employment, annual wages, and annual sales for West Virginia wood product industries, 1981

Activity	Number of establishments	Employees	Annual wages	Annual sales
Logging	587	3,522	14.09	34.41
Lumber, wood products, & furniture manufacture	483	11,591	102.42	371.16
Paper products manufacture	28	1,600	15.60	78.70
Total	1,098	16,713	135.11	484.27

Source: [19].

Comparison of the US Census survey to Murriner's survey reveals large differences in the number of establishments, employees, and annual wages. Although the surveys were not conducted in the same year, one would not expect to find such large differences from one year to the next. Specifically these are.

Source of estimate	Number of establishments	Number of employees	Annual Wages ($ mil.)
Murriner (1981)	1,098	16,713	135.1
Census of Manufactures (1982)	436	6,400	76.6

Industry Size and Economic Performance..., continued

Much of the difference can probably be explained by the fact that Murriner's survey included part-time sawmill operations and a substantially larger number of roundwood producers. These operations employ only a few workers per establishment. The census does not accurately canvass these smaller firms and thus misses many establishments with few employees. Consequently, census figures probably underestimate the number of establishments and to a lesser extent employment and payrolls in West Virginia's wood-based industries. Murriner's figures, therefore, probably represent a more realistic estimate of the overall size of West Virginia's wood industry.

It also should be noted that the Census of Manufactures does not include tree farms and nurseries, private forestry services, retail lumber outlets, the transportation and marketing of timber and wood products, nor the substantial number of state and federal workers who manage public forests in West Virginia. In 1972, an estimated 10,070 people were employed in these aspects of the forest industry [8]. The value added attributed to timber management, transportation, and marketing in West Virginia was estimated to be $204.7 million in 1982 (Appendix Table A2).

But Murriner's survey collected only the most basic information concerning each establishment. Additional economic data concerning West Virginia's wood products industry must be gleaned from other sources. Although some sources, such as the US Census, provide more information, it is not possible to break down S.I.C. groups to analyze individual industries because of disclosure laws. To get more specific information, it is necessary to depart from census data in favor of a more activity-oriented approach.

In 1984, the West Virginia Department of Natural Resources, Division of Forestry, published an updated *Directory of West Virginia's Forest Industry*. It was compiled from information provided by county service foresters and subsequent responses to a mail questionnaire. Although the directory is not all-inclusive, it does provide the most comprehensive listing of West Virginia's forest industry (Table 5).

The number of establishments listed in the directory almost agrees with the number of establishments reported by Murriner in 1981. Most prominent among West Virginia's wood manufacturing establishments are roundwood producers, sawmills, and rustic product mills. In contrast, secondary manufacturers comprise only 23 percent of all wood product manufacturing plants in the state.

Source: [17].

THE PRIMARY WOOD INDUSTRY SEGMENT

West Virginia's primary forest products industry includes those establishments which are actively engaged in the cutting, transportation, sawing, slicing, chipping, or other initial processing of raw wood. In West Virginia this includes logging camps and contractors (S.I.C. 2411), sawmills and planing mills (S.I.C. 2421), hardwood dimension and flooring (S.I.C. 2426), special product mills (S.I.C. 2429), hardwood veneer manufacturing facilities (S.I.C. 2435), paperboard mills (S.I.C. 2461), and firms producing gum and wood chemicals (S.I.C. 2861). Complete definitions for these industries can be found in Appendix Table A1.

Logging (241) and sawmilling (242) account for the majority of the primary industry's manufacturing. In 1982, they produced $139 million worth of wood products and added $58.1 million in value through manufacture. They also employed 3,000 workers and paid $29.9 million in wages and salaries. When the remaining primary industries are included, it is estimated that the primary industries generate about 48 percent of total wood industry shipments, 47

Primary Wood Industry Segment, continued

percent of its value added, 51 percent of its payroll, and employ about 57 percent of West Virginia's wood industry labor force.

Primary manufacturers comprise 77 percent of all wood product manufacturing plants listed in the 1984 directory.[4] Sawmills account for 43 percent of all wood product plants in West Virginia. Custom sawmills, mainly small, individually owned, part-time operations, account for another 27 percent, so that altogether sawmills account for 70 percent of all wood product plants in the state.

Logging Camps and Contractors

Roundwood producers represent the greatest number of wood industry establishments in West Virginia. These firms represent the first stage in the wood manufacturing process—timber harvesting and transportation. In the past, logging was a very labor intensive operation, but with the invention and use of modern mechanical harvesters, skidders, loaders, and tandem trucks, logging enterprises now require large amounts of capital investment to remain productively and economically efficient. Although some large sawmills and other wood industries have diversified into timber harvesting to assure themselves of a dependable raw material supply, independent logging contractors still form the bulk of West Virginia's timber harvesting enterprises (Table 6).

Logging Camps and Contractors, continued

ments in West Virginia employing approximately 800 workers.[5] Eighty-five percent of all logging contractors had less than ten employees, and only five firms had more than twenty employees [15]. The annual payroll for all employees was $7.7 million, with production workers, on average, being paid $10,286 per year. The industry accounted for $15.9 million in value added by manufacture while shipping nearly $37.1 million worth of products. The industry's cost of materials, principally timber stumpage, amounted to $21 million.

Wood Concentration Yards and Chip Mills

Timber is a heavy, bulky, raw material that must be transported, at considerable cost, from the harvest location to various manufacturing sites. When possible, primary wood-processing plants attempt to locate close to available timber supplies, but often it is still necessary to transport timber from distant locations. To avoid unnecessary transportation and to help ensure adequate raw material supplies, timber is often concentrated at strategic locations prior to marketing or processing. Most sawmills maintain a wood storage yard adjacent to the mill but some have established additional wood concentration yards away from the mill. These yards, usually located on rail lines, enlarge the mill's procurement area and allow more flexibility in gathering and sorting roundwood: they also allow better control of timber flow into the mill's main woodyard. Concentration yards also facilitate timber brokerage—selected logs are sometimes marketed directly from these concentration yards to other mills or for export.

Consider the case of Westvaco Corporation, which draws a considerable volume of pulpwood from West Virginia to supply its pulp and paper mills at Luke, Maryland, and Covington, Virginia. To facilitate roundwood procurement, Westvaco has established six wood concentration yards in West Virginia to accumulate roundwood until it is needed or can be transported in bulk. Westvaco also operates a chip mill at Inwood, Berkeley County, West Virginia. It can produce 500 tons of woodchips per day from tree length pulpwood. These chips are then transported via rail or truck to the pulp and paper mill at Luke.

Awegot of West Virginia, Inc. also operates a chip mill at Deepwater, Fayette County, West Virginia. It has capacity of approximately 220 tons per day and produces metallurgical chips. These wood concentration yards and chip mills employ approximately 50 people and facilitate the movement and processing of wood raw material throughout West Virginia.

---

[5] The number of logging contractors reported in the census is substantially less than reported in the roundwood producers directory of 1981. Consequently, census figures for employment and value statistics are probably underestimated.

Sawmills

With 1982 lumber shipments valued at approximately $101.9 million, lumber is West Virginia's single most valuable timber product. In 1979, 75 percent of the annual timber harvest went into lumber production with West Virginia's sawmills receiving 369 MMBF[6] of sawlogs that year. These logs were sawn mainly into grade lumber, mine timbers, railroad ties, house logs, dimension stock, and cooperage. The sawing process also produced large volumes of wood residues, a large portion of which were converted into wood fiber, charcoal, and other wood products, or were burned as fuel.

In 1984, 259 sawmills with annual capacities over 100 MBF were operating in West Virginia [17].[7] Trends in the number of sawmills showed a consistent decline in the period 1965-1979 (Table 7). Most of this decline occurred in the low-production mills (less than 1 MMBF/year), but the number of high-production mills also declined during that time [6]. There were an additional 58 sawmills reported operating in West Virginia in 1984 as compared to 1979; although not conclusive, this may indicate a post-recession recovery in the lumber industry.

Forty-four percent of West Virginia's sawmills produced less than 500 MBF of lumber per year in 1984. Sixty-two percent were producing less than 1 MMBF annually. Only 38 percent of all sawmills in the state were categorized as high-production mills capable of producing more than 1 MMBF of lumber annually. Only four sawmills had a reported production capacity of 10 MMBF or more per year.

Total sawmill capacity for the state in 1984 was reported to be at least 287.85 MMBF/year with a maximum capacity in excess of 606.25 MMBF/year [17].[8] The US Bureau of the Census Lumber Production and Millstock Reports show that in 1984 West Virginia's sawmills produced only 285 MMBF of lumber.

The northeastern region of the state had the greatest concentration of sawmills with Randolph and Preston counties reporting the highest lumber-producing capacities in the region. Nicholas County, in the southern region, had the largest number of high-production mills in the state and the highest sawmilling capacity in the state as well (Figure 3).

Lumber production in West Virginia is moderately concentrated among four wood product companies—Coastal Lumber Company, Todco Inc.,[9] Georgia-Pacific Corp., and Interstate Lumber Company. These companies account for 22-30 percent of the state's lumber-producing capacity. Coastal Lumber Company, with its recent purchase of Geneva Lumber Company now has the

[9] Todco, Inc. recently sold three of its four West Virginia sawmills.

Sawmills, continued

highest sawmill capacity in the state with the capability of producing 60 MMBF of lumber annually at its five sawmills.

West Virginia's sawmill industry includes many small, individually or family-owned low-production sawmills. Individuals own 39 percent of all sawmills producing over 100 MBF, but account for only 7-11 percent of the state's sawmill capacity. Family-owned enterprises represent 32 percent of West Virginia's sawmills and account for 28-31 percent of sawmill capacity. Together these two ownerships represent 71 percent of all sawmills producing over 100 MBF and 35-42 percent of the state's lumber-producing capability. In contrast, large corporations account for 6-8 percent of sawmill capacity while representing only 2 percent of sawmill ownerships. However, the bulk of the state's lumber production—53 to 65 percent—comes from independent lumber companies, which represent 19 percent of the state's sawmills with annual capacities greater than 100 MBF (Figure 4).

The circle saw is the most common headsaw used in West Virginia. In fact, this was the only saw used by sawmills with an annual production capacity less than 1 MMBF. Only 18 band saws were operating in West Virginia in 1984 and all but three of these mills were producing over 5 MMBF annually. Associated sawmill equipment currently being used in West Virginia sawmills is presented by mill size class in Table 8. One important observation is the fact that only 13 of the state's sawmills reported any kiln drying capacity.[10] This low level of kiln drying is a major constraint to secondary wood manufacturing in the state.

Sawmills and planing mills,[11] and special product sawmills, n.e.c.,[12] are all grouped under S.I.C. code 242 by the US Bureau of the Census. Together these firms employed 2,200 workers in 1982, with an annual payroll of $22.2 million, based on 188 reported establishments. These establishments spent $60.6 million for materials and had a value of shipments of $101.9 million—27 percent of shipment values for the entire wood products industry. Estimated value added for the sawmill industry was $42.2 million—26 percent of all value added through wood products manufacturing. In addition, the sawmill industry accounted for 34 percent of all wood manufacturing employment and 29 percent of the wood industry's annual payroll [15].

---

[10] An independent study reported 23 sawmills having dry kilns [1].

[11] Planing mills are defined as mills being primarily engaged in the manufacture of hardwood dimension stock and flooring.

Veneer Mills

Veneer is a thin layer of wood sliced from a log. Layers of veneer are bonded together to form plywood; high-quality (face) veneers are also used as surface layers over less expensive materials such as particleboard [6]. Veneer can be categorized into three types based on its use: 1) commercial and face veneer is used in the plywood and furniture industries, 2) container veneer is used in fabricating baskets and produce containers, and 3) specialty veneer is used in manufacturing a variety of products such as toothpicks, tongue depressers, swizzle sticks, etc.

As late as November, 1984, West Virginia had three commercial veneer plants in operation. As of January, 1985, one plant could not be contacted and was assumed to have ceased operations. The two remaining veneer manufacturers, The Dean Company of Princeton, West Virginia and the Erath Veneer Corporation of Martinsburg, both produced commerical and face veneer for domestic furniture and plywood industries and for export to Canada, Europe, and the Orient. The manufacture of commercial and face veneer requires high-quality logs which must meet exacting specifications. Logs of desirable species and quality are not always available locally and must often be imported from great distances at a high cost.

Production at West Virginia's veneer plants in the 1980s has been more than five times that of the mid-1970s. In 1980, veneer log receipts at West Virginia veneer mills totaled 23.4 MMBF. Currently the veneer industry has the capacity to produce approximately 140 million ft.^{2} of veneer annually and employs about 180-200 people. Due to disclosure laws additional economic data is not available.

Paperboard Mills

Presently, paperboard manufacturing within West Virginia involves the reprocessing of waste paper into fibers than can be manufactured into paperboard, linerboard, and other converted paper products. The recycling process requires the waste paper to be ground and mixed with water and chemicals to form a pulp, which is then reformed into paper. Two companies are now recycling paper into paperboard products in West Virginia.

The Banner Fiberboard Company, located in Wellsburg, West Virginia, used about 12.5 tons of waste paper to produce approximately 12 tons of processed fibers in 1984. The processed secondary fiber is then sold and manufactured, primarily into linerboard, outside the state.

The Halltown Paperboard Company, in Jefferson County, is a much larger refiner of recyclable papers. It uses about 65,000 tons of waste paper annually to produce about 50,000 tons of paperboard per year.

About 220 workers are employed in West Virginia's paperboard industry, but due to disclosure laws no other economic data is available. All economic activity from paperboard manufacturing is included in the statistics for S.I.C. code 26 in Table 2.

Source: West Virginia University, Agricultural and Foresty Experiment Station, "Forests: The West Virginia Economy," Bulletin 691, Volume 4, April 1986.

Other Primary Industries

In addition to the industries already discussed, the primary wood industry in West Virginia also includes several specialty wood product manufacturers. Among these, rustic product mills are the most numerous. The 1984 directory of West Virginia's forest industry listed 32 such firms producing a variety of products including rustic fencing, locust posts, landscaping timbers, and firewood. In 1979, the state's rustic fence industry produced over 3 million pieces—most of which were exported to markets in the eastern United States.

Aside from fencing, several log and bolt mills manufacture such specialty products as log homes, handle blanks, crib block, and stave blanks. All economic activity generated by these rustic product mills is included in the census statistics for S.I.C. code 242 (sawmills and planing mills).

Charcoal manufacturing is included under S.I.C. group 2861 (Gum and Wood Chemicals). Presently, only one firm manufactures charcoal in West Virginia—Kingsford Charcoal Company in Parsons, Tucker County. It uses sawmill residues and charcoal dust to produce charcoal briquettes. it has been estimated that the plant converts approximately 300,000 tons of chips, bark, and dust into about 75,000 tons of charcoal per year. The plant employs about 160 workers.

Athough no firm in West Virginia is presently manufacturing wood chemicals, techologies do exist that allow ethanol, cattle feed, absorbants, and other derivatives to be produced by breaking down wood fiber into its various chemical components.

Economic statistics for S.I.C. 2861 are not available due to disclosure laws.

THE SECONDARY WOOD INDUSTRY SEGMENT

Secondary wood industry firms in West Virginia are those firms engaged in the remanufacture of lumber, plywood, veneer, paper, and other wood products into finished goods for consumer use. The *1984 West Virginia Forest Industry Directory* lists 140 such firms manufacturing a wide variety of wood products from kitchen cabinets to hot tubs and paper bags. However, the majority of the state's secondary wood-using industries are small, employ relatively few workers, and serve limited markets. In fact, only 47 secondary wood industry firms employ 20 or more workers.

Historically, West Virginia has been a lumber-producing state rather than a wood product manufacturing state. Basically, secondary wood manufacturing activity in the state is not as diversified nor as extensive as it should be, considering the availability of raw materials, the size of the state's primary wood industry, and the proximity to major metropolitan markets. Evidence of this is that in 1981 West Virginia was ranked 25th among all states in volume of timber harvested but only 39th in value added by manufacture of wood products. This indicates that the full value of the state's timber resource, as well as potential employment opportunities, are not being realized due to the present size and structure of West Virginia's wood products industry.

The 1982 Census of Manufactures reported statistics for 81 secondary wood industry firms.[13] They shipped approximately $198.1 million worth of products while paying $113.9 million for materials. In addition, approximately $85.2 million of value was added through the manufacture of secondary wood products such as furniture, wood containers, and paper products. The census also reported that the secondary wood industry segment employed about 2,700 workers and had an annual payroll of $37.8 million.

However, because the census does not generally canvass wood products firms with less than five employees, it may be more accurate to again adopt an activity-oriented approach. Table 9 has been compiled from several sources in order to provide the most accurate accounting of the state's secondary wood industry. Figures in this table provide information on an additional number of firms with a substantially larger work force.

Most of these firms are small, with 38 percent employing less than ten people. Only 12 firms had a work force greater than 100 people; however, they accounted for 60 percent of secondary wood industry employment [6]. The typical small size of the state's secondary wood-using establishments is a major economic disadvantage. Small firms lack the resources to be competitive in product marketing and often cannot acquire the capital to finance needed expansion.

Secondary wood-using firms are found in 42 of the state's counties, but only Randolph and Upshur have more than ten firms. Even in these counties there is no concentration of secondary wood industry firms. Resulting from this, or perhaps contributing to it, is the lack of a skilled and experienced wood manufacturing labor force. Although the state's people are familiar with forest utilization activities, there has been little opportunity to acquire the skills necessary to manufacture furniture and other high value wood products in today's modern facilities. The concentration of such a labor force in strategic areas throughout the state would certainly be attractive to new enterprises that may be considering business locations in West Virginia. (The furniture makers of the High Point, North Carolina, area would be an example.)

Unlike the primary wood industry, secondary wood industry location tends to be market-oriented rather than resource-oriented. Because of this, secondary establishments prefer to locate closer to consumer markets or major transportation arteries. In the past, West Virginia's lack of major interstate highways helped suppress establishment of secondary manufacturing industries. Instead, these businesses chose to locate in neighboring states. However, West Virginia's strategic location relative to eastern and midwestern markets, and its completion of major highway corridors should help alleviate this situation.

---

[13] Included are firms which manufacture furniture from non-wood materials.

The Secondary Wood Industry Segment, continued

By definition, the secondary wood products industry uses wood that has already undergone some form of processing. For the most part, West Virginia's primary wood industry can supply all of the needed material input for secondary manufacturing. An additional requirement for most solid wood product manufacturing, however, is that lumber be dried prior to use in order to avoid splitting, shrinkage, or some other defect in the final product. Experts agree that "drying is a necessary intermediate step between primary conversion of logs into lumber and secondary manufacture of wood products" [1].

In 1982, West Virginia's lumber production was estimated to be between 250-300 MMBF—most of which was exported green or air-dried to other states. Only 61.2 MMBF of lumber was kiln dried in the state. This is approximately 21-24 percent of total lumber production—well below the national average of 65 percent. In 1983, only 27 firms were operating dry kilns in the state, with the greatest concentration found in Randolph County. This low level of kiln drying activity is seen as an obstacle to the development of medium-sized secondary processing plants and is an "indication of the weakness of West Virginia's secondary manufacturing industry" [1].

The majority of West Virginia's secondary wood industry firms manufacture more than a single product. This is especially true in S.I.C. groups 24 and 25 where horizontal and vertical integration is not only possible but economically beneficial. In fact, almost all firms engaged in the manufacture of millwork, wood pallets and skids, boxes and wood containers, structural wood members, and wood preserving are associated with a sawmill operation. Integration with a primary industry assures secondary manufacturers of material input that meets production specifications for their products. And by manufacturing several products, the firm strengthens its ability to profit in a competitive and fluctuating market. Some of the larger firms not only manufacture primary and intermediate wood products but have combined these activities with the manufacture of wood furniture and other finished products.

†Inflated using the Producer's Price Index for all commodities.

Source: US Bureau of the Census, *Census of Manufacturers 1972, 1977, and 1982.*

Value of Shipments

After eliminating the effects of inflation, the value of shipments from West Virginia's wood product manufacturers declined 23.5 percent from 1972-1982 (Table 10). After a slight decrease of 7.1 percent from 1972-1977, the value of shipments dropped more dramatically from 1977-1982—an additional 17.6 percent.

Despite the substantial decline overall, the furniture and fixtures segment managed to minimize its loss of shipment values to less than 2 percent. This is in contrast to a 30.3 percent drop in lumber and wood product shipment values and an 18.0 percent loss in the value of allied paper product shipments (Table 11).

The greatest increase in value of shipments over the ten-year period was recorded by the logging camps and contractors segment, which showed a 7.0 percent gain, despite substantial declines in timber harvest volumes throughout the 1970s.

Sawmills and planing mills, meanwhile, saw their value of shipments fall 41.7 percent, while shipment values in firms manufacturing millwork, veneer, and structural wood members dropped 49.3 percent. During this ten-year period, the price of lumber (which accounted for 29 percent of all wood product shipment values in 1977) increased at a slower rate than the prices in the general economy; thus the constant dollar decrease in the value of shipments reflects a decrease in the real economic value of lumber as well as any decrease in the physical volume of shipments.

Value of Shipments, continued

This is not true for the paper and allied products industry which experienced a more moderate drop in shipment values. In general, prices for paper products increased about the same as all commodities, meaning that the drop in shipment value was a direct result of a decreasing physical volume of output. Hopefully, given the incentive of higher relative prices for paper products, it should not be difficult for the state's paper products industries to recover from this moderate slump.

Cost of Materials

There was a slight decline in the overall cost of materials purchased by West Virginia's wood industry over the ten-year period. Material costs remained constant from 1972-1977, but declined 11.4 percent from 1977-1982, for a net decrease of 11.0 percent (Table 12).

There also was a marked variation in material cost trends among individual wood industry segments. Although material costs for the lumber and wood products segment declined 19.5 percent, the furniture and fixtures industry incurred a substantial 15.8 percent increase. The allied paper products industry, meanwhile, experienced a slight drop in its cost of materials—5.0 percent during the ten-year period.

Raw material costs were also found to vary among industries within the same S.I.C. group. For instance, logging camps and contractors were faced with a 16 percent increase while both sawmills and millworking establishments experienced considerable reductions. The reductions in the sawmill and millworking industries probably resulted from lower material purchases brought on by the depressed wood products market during the recent recession.

In the case of logging camps and contractors, however, higher material costs can be explained by the fact that almost all material costs incurred by logging contractors are derived from purchases of timber stumpage. Since timber harvests were declining over this time period, the increase in costs for loggers represented real increases in the price of timber stumpage. Logging contractors were able to pass most of this increase in costs on to log buyers, as reflected in their real increase in value of shipments despite their lower physical output.

Value Added

Basically, value added in manufacturing is the difference between an industry's value of shipments and its cost of materials. It represents revenue available to cover additional operating expenses such as payroll, rent, capital investment and depreciation, taxes, and profits. The sum of all value added in a country's economy represents gross national product (GNP).

Since 1972, overall value added fell by 35 percent for West Virginia wood product manuiacturers (Table 13). Reductions in value added occurred in every major segment in the state's wood industry except logging camps and contractors. For instance, after adjustment for inflation and despite a 24 percent reduction in cost of materials, sawmills and planing mills still sustained a 50.0 percent loss of value added. In the lumber and wood products segment as a whole, value added declined 39.4 percent. Meanwhile, the paper and allied products segment suffered a 32.0 percent loss and the furniture and fixtures industry experienced a more moderate decline of 17.8 percent. This represents a serious loss of operating revenue and profits to the state's wood industry.

Total value added in these industries declined by a greater percentage then did their total value of shipments; consequently, the value added per dollar of shipments for the wood industry fell from 49 cents in 1972 to 42 cents in 1982. The relationship between value of shipments and cost of materials also changed. By 1982, the wood industry's value of shipments per dollar cost of materials had decreased form $1.99 in 1972 to $1.71. This meant that the cost of materials expressed as a percentage of the wood industry's total value of shipments rose from 50 percent to 58 percent over the ten-year period.

The only segment of the wood products industry to avoid a real decrease in value added between 1972 and 1982 was logging camps and contractors. Probably because of the increased economic value of sawtimber and increased operating efficiency, loggers were able to maintain their margin of value added by manufacture.

Employment and Payrolls

Employment in West Virginia's wood products industries declined 27.3 percent over the ten-year period, representing a loss of 2,400 jobs. This loss was reflected in a 33.3 percent reduction in the size of wood industry's payroll, in constant 1982 dollars. Again, these declines were evident in every segment of the wood industry except logging camps and contractors, where payrolls declined slightly while employment remained constant (Tables 14 and 15).

The lumber and wood products industry (S.I.C. 24) sustained a 30 percent decline in its work force—losing some 1,800 employees by 1982. This decline was already evident prior to 1977; the recession only accelerated it.

This was also true of the entire wood industry's payroll. In 1982, West Virginia's wood industry was not only employing fewer people but was paying them lower real wages than ten years earlier. The average wood industry worker earned $11,969 in 1982—down 6.9 percent from 1972. Logging camps and contractors paid the lowest wages in the wood industry, which apparently

Employment and Payrolls, continued

helped them attain real gains in other economic measures. The highest annual wages were found in the paper and allied products industry where workers manufacturing paperboard containers earned $19,800—up 7.1 percent since 1972 (Table 15).

Generally, wood industry payrolls comprised a slightly smaller share of value added in 1982 than in 1972. Payrolls accounted for 50 percent of value added in 1972 as compared to 48 percent in 1982. Thus, even while the industry's work force and payrolls were declining, its value added and productivity were declining as well. This virtually eliminated any advantage in payroll cost reductions. This would also seem to indicate that workers were not being eliminated because of increased plant efficiency, but because of cutbacks and plant closings brought on by a weak wood products industry facing poor economic conditions. This is supported by the fact that value added per employee dropped 3.7 percent during the ten-year period—from $25,751 to $24,796 in constant 1982 dollars.

DISCUSSION OF INDUSTRY TRENDS

It is not easy to explain the decline in West Virginia's wood industries, especially in light of the tremendous advantage and potential associated with the state's forest resource. It would be simple to contend that 1982 was a recession year and that the census data were not representative of the ten-year period, but most of the previously discussed economic measures indicate that a decline was occurring in the state's wood industry prior to 1977. The severe recession of 1980-82 only served to reinforce this downward trend.

During this period, stumpage prices were rising in real terms while the prices for lumber and other wood products were falling behind the rate of inflation. From 1972-1977, the wood industry's cost of materials was remaining constant, while its value of shipments was declining, thus eroding the industry's value added through manufacture. The 34.9 percent reduction in value added over the ten-year period decreased revenues available for rent, taxes, interest, payrolls, and not least, profits. During this time the industry's new capital expenditures fell 48.0 percent as a result of this squeeze on discretionary revenue (Table 17).

Although these negative trends also were found in the wood products industry outside the state, the consequences of these conditions probably fell more heavily on West Virginia because of the small, segmented, and undiversified nature of its wood industry. Recall that lumber and wood products manufacturing (S.I.C. 24) dominates the state's wood-based industires, accounting for 66 percent of wood industry employment, 56 percent of its value of shipments, and 56 percent of its value added. From 1972-1982, the industry was faced with rising real costs for stumpage and other materials while the price of lumber and other wood products was not keeping up with inflation. Thus, the wood products industry had no real price incentive to market its products; the only exception was the paper and allied paper products industry.

The inability of West Virginia's wood product manufacturers to compete under these adverse economic conditions stems from the small size, lack of integration, and undiversified product line of the typical West Virginia wood manufacturing establishment. It was these structural characteristics, combined with a poor economy, that forced many wood-using firms to reduce operations or shut down unprofitable mills.

SUMMARY AND COMMENTS

In 1982, the state's wood product industries shipped $381.8 million worth of wood and paper products and added $160.4 million in value through manufacture. These wood-based industries employed approximately 6,400 workers and paid about $76.6 million dollars in wages and salaries. Expenditures for new capital investments amounted to only $9.4 million in 1982.

Primary conversion industries dominate wood-based manufacturing in West Virginia, accounting for 77 percent of wood product manufacturing plants and more than half of the wood industry's labor force. The primary segment contributes 48 percent of the wood industry's value of shipments, 51 percent of its payroll, and 47 percent of its value added through manufacture. It is evident then, that the majority of the wood-based industry's resources account for only about half of its economic output.

In contrast, the 56 firms that manufacture secondary solid wood products account for 24 percent of the industry's value added, as compared to the 47 percent attributed to the 355 firms in the state's primary industries. Even more impressive is the contribution of the allied paper products segment (S.I.C. 26). These 25 firms account for the remaining 29 percent of the wood industry's value added through manufacture.

Overall, the amount of value added generated by the state's wood industry is relatively low. This is a direct result of the low level of secondary wood manufacturing occurring in the state. Lumber is the state's major product, but most of West Virginia's production is used or exported with little manufacture after primary conversion. Little of the state's lumber is kiln dried, and most secondary manufacturing in S.I.C. group 24 (lumber and wood products) adds little value to the final products.

The typical sawmill in West Virginia is small and inefficient. As a consequence, most sawmills lack the financial resources to invest in the latest technology and equipment. Low-value products such as mine timbers or disposable pallets are sometimes manufactured from quality logs and lumber because the mill owners do not have the knowledge and equipment required to manufacture grade lumber, furniture blanks and similar high-value products. Nor do they have the knowledge of regional markets to capitalize on the demand for these products.

Even if improvements were made in the efficiency of West Virginia's sawmills, the full value of the state's timber resources would still not be realized due to the limited manufacturing of secondary wood products. Secondary manufacturing is the weak link in the state's forest-based industry. By failing to manufacture finished wood products in the state, West Virginia is forfeiting not only added product value, but jobs, personal income, and tax revenue as well.

Because of the small size and fragmented structure of the state's wood industry and the scarcity of investment and operating capital, it will be difficult for West Virginia's wood industry to recover quickly from the declines

Summary and Comments, continued

observed from 1972-1982. Also, it is unlikely that the wood products industry can fully capitalize on the state's improved forest resource base unless progressive and coordinated efforts are made by both public and private concerns to improve the structure, competitiveness, and marketing power of West Virginia's wood-based industries.

The present structure of the state's wood-based industry, which is heavily skewed towards primary manufacturing, is denying the realization of the economic potential present in its forest resources. The present weakness is considerable and will require a dedicated, long-term program targeted at promoting development and expansion of the secondary wood products industry.

OFFICIAL NOTIFICATION

FLOATING MORTGAGE CEILINGS

Pursuant to the provisions of Chapter 47-6-5b of the West Virginia Code, the Commissioner of Banking has ordered that the maximum rate for any nonprecomputed loan of money made under the provisions of the aforesaid statute and secured by a mortgage or deed of trust upon real property is as follows for such loans made during the calendar months indicated:

Also Pursuant to the provisions of §31A-4-30a of the West Virginia Code, the Commissioner of Banking has ordered a maximum rate of interest on loans of money made by persons or by banks chartered under state law in the Fourth and Fifth Federal Reserve Districts as follows until the discount rates now in effect change:

Floating Mortgage Rate		Discount + 1%
December, 1984	13.50% per year	9.00% per year (12/24/84)
January, 1985	13.00% per year	
May, 1985	13.50% per year	8.50% per year (5/20/85)
June, 1985	13.00% per year	
July, 1985	12.50% per year	
August, 1985	12.00% per year	
October, 1985	12.25% per year	
December, 1985	12.00% per year	
January, 1986	11.75% per year	
February, 1986	11.25% per year	
March, 1986	11.00% per year	8.00% per year (3/7/86)
April, 1986	10.50% per year	7.50% per year (4/21/86)
May, 1986	9.50% per year

[1] Counties with suppressed sales (if applicable) are listed at end of table rather than by rank to avoid disclosing data for individual companies.

[2] Each kind-of-business classification includes leased departments classified in that kind of business as if they were separate establishments. Accordingly, data for leased departments are not consolidated with kind of business data for main stores in which they are located. For more information, see Comparability of 1977 and 1982 Censuses in appendix A.

[3] Excludes nonemployer direct sellers, SIC 5963.

Note: Statistics for some industry groups and industries have been withheld to avoid disclosing data for individual companies and to permit further verification of data for smaller industries. Statistics for industry groups shown include data for all component industries, regardless of whether data are shown for individual industries in group. Data for all industries with 150 manufacturing employees or more will be included in final publication if figures do not disclose data for individual companies. The following employee size ranges substitute for actual figures withheld to avoid disclosure: AA-150 to 249 employees; BB-250 to 499 employees; CC-500 to 999 employees; EE-1,000 to 2,499 employees; FF-2,500 employees or more.

[1] Payroll, employment, and sales data for some small single-unit companies with up to 20 employees (cutoff varied by industry) were obtained from administrative records of other government agencies rather than from census report forms. These data were then used in conjunction with industry averages to estimate the items shown for these small establishments. This technique was also used for other establishments whose reports were not received at time date were tabulated. The following symbols are shown where estimated data account for 10 percent or more of figures shown: E1-10 to 19 percent; E2-20 to 29 percent; E3-30 to 39 percent; E4-40 to 49 percent; E5-50 to 59 percent; E6-60 to 69 percent; E7-70 to 79 percent; E8-80 to 89 percent; E9-90 percent or more.

[2] Includes establishments with payroll at any time during year.

[3] Aggregate of cost of materials and value of shipments includes extensive duplication since products of some industries are used as materials by others.

[4] 1982 data for value added are suppressed in this preliminary report. See text for explanation.

CASH FARM INCOME, GOVERNMENT PAYMENTS AND VALUE OF PRODUCTS CONSUMED ON FARMS IN WEST VIRGINIA

Notes for Cash Receipts by Commodities...

*Less than 0.05 percent. Percentages may not be accurate to 0.1 in last digit because of method of machine computation.

NA = not available.

1/ USDA estimates and publishes individual cash receipt values only for major commodities and major producing States. The U.S. receipts for individual commodities, computed as the sum of the reported States, may understate the value of sales for some commodities, with the balance being included in the appropriate category labeled "other" or "miscellaneous." The degree of underestimation in some of the minor commodities can be substantial.

2/ Except for mohair, the livestock commodities include only State estimates of income for which USDA estimates value of marketing for 1983-85. All other estimates, while included in commodity group totals, are not listed separately but are combined as appropriate in "other livestock" to prevent disclosure of confidential data.

3/ Commodites do not add to group total because broilers, turkeys, and minor commodities--turkey eggs, ducks, geese, guineas, and other poultry as estimated--are included in "other livestock" below in order to avoid disclosure of confidential data. All minor commodities may not be estimated in all States.

4/ Cash receipts include value of home consumption.

5/ Commodities do not add to group totals because broilers, turkeys, and mohair for certain States and other minor commodities, such as bees, horses and mules, goats, goatmilk, mink and other pelts, rabbits, catfish, reindeer, and other livestock and products when reported are included for all States in "other livestock" in order to avoid disclosure of confidential data.

6/ See footnotes 3 and 5.

7/ Except for rye, barley, corn, oats, sorghum grain, flaxseed, peanuts, soybeans, dry edible beans, dry field peas, potatoes, sweetpotatoes, citrus fruit, apples, apricots, avocados, cherries, dates, grapes, peaches, pears, plums, prunes, pecans, sugarcane syrup, alfalfa seed, fescue seed, crimson cloverseed, lespedeza, orchardgrass, red cloverseed, sweet cloverseed, timothy, vetch, popcorn, strawberries, forest products, and greenhouse and nursery products, the commodities include only State estimates of income for which USDA estimates the value of production for 1985. Allowances are made in "other" categories for other States as all other estimates, while included in commodity group totals are combined as appropriate in "miscellaneous vegetables," "other berries," "other fruits and nuts," or "other field crops" items.

8/ Includes vegetables produced in the State but for which USDA does not estimate individual values of production.

9/ Includes other melons except honeydews and watermelons.

10/ Gooseberries and other berries.

11/ Includes fruits and nuts produced in the State but for which USDA does not estimate individual values of production.

12/ Includes seeds produced in the States but for which USDA does not estimate individual values of production.

13/ Includes seed and other field crops produced in the States but for which USDA does not estimate individual values of production.

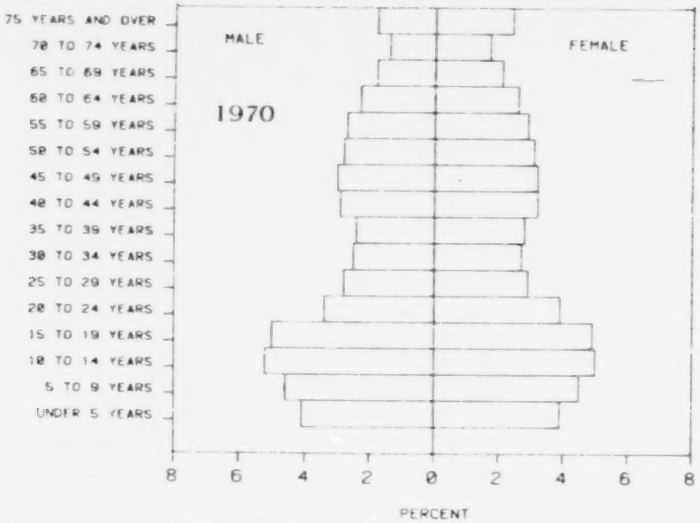
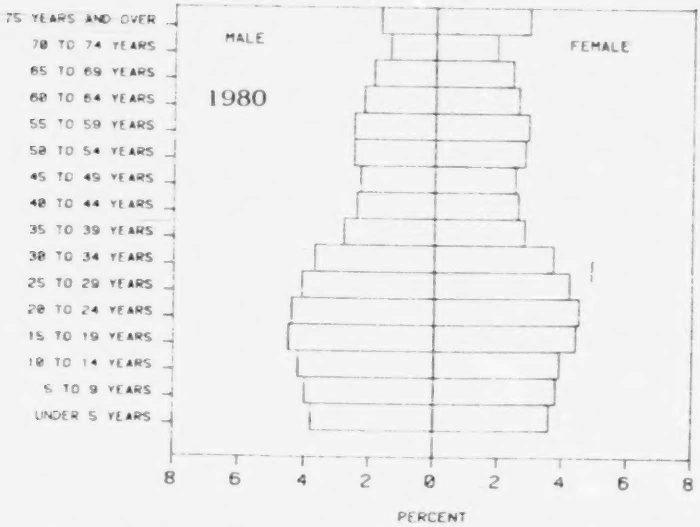
WEST VIRGINIA AGE/SEX DISTRIBUTION





Population analysis by age, particularly age cohorts, is important for government planners and policy makers. The proportional sizes of the various age groups and trends in age cohort groupings are used in calculating intercensal population estimates and projections. These figures, in turn, are used to determine the size of potential populations in areas such as education, health care, housing, transportation, and energy. Economic trends and outlooks can also be predicted when the age composition of a population is known and based on the potential manpower labor force populations.

In sum, services required and provided to a state or county are a reflection of that state's or county's population age structure. Any changes in the age structure through birth, death, and migration will trigger corresponding changes in government services.

POPULATION PYRAMIDS AND DATA ANALYSIS

A population pyramid is a way to graphically represent age and sex characteristics of a population. Because computer graphics programs can produce population pyramids quickly and economically, they are often used as tools for analysis.

This type of graph makes it easier to compare population characteristics of different time periods for different geographic regions. A population pyramid displays age data vertically in 5 year age cohorts up to age 75 and over. Each horizontal bar represents the percent of the population in that age group. Traditionally, the male population is shown on the left side of the pyramid and the female population is shown on the right side. A population pyramid not only indicates the percent of people who are in a particular age group at the present time but also the percent that will likely be in that group in future years. The various shapes of population pyramids reflect changes in fertility, mortality, and migration.

The triangular shape of the population pyramid for West Virginia in 1950 indicates a growing population and a high birth rate. This shape is typical of less developed countries. This pattern reflects a population normally distributed through all age cohorts: there are more people of younger ages relative to other cohorts since death reduces the upper bars.

A comparison of state population pyramids for several time periods shows much about past migration patterns. States are sensitive to migration trends whereas countries such as the United States are not. For example, the population pyramid for West Virginia in 1960 shows a decrease in two age groups: 20 to 24 and 25 to 29. This decrease indicates a selective migration out of the State among young persons. Such a migration often reflects a lack of economic/employment opportunities. This same pyramid shows the beginning of a declining birth rate and an increase in the percent of the population age 75 and over.

The population pyramid for West Virginia in 1970 shows a continuation of these same patterns. The post-war baby boom, the cohort born between 1946 and 1964, is clearly visible in the lower bars. The pyramid also shows that the birth rate for the State continues to decline and the elderly segment increases. Furthermore, the graph shows that above the age of 65 women live longer than men.

West Virginia's population trends are now similar to national population trends. The population pyramid for West Virginia in 1980 looks very much like the pyramid for the United States in 1980. The shorter bars at the bottom show that the birth rate has been declining for about 15 years. The small bar at age 45-49 reflects the low birth rate during the Depression years.

Although the Black and White population pyramids for 1980 appear vastly different, they actually reflect the same trends that occured in the State's total population. While the effects of the baby boom and out migration are obvious in the White population pyramid, they are much more pronounced in the Black population pyramid. Both pyramids display a large proportion of older persons.

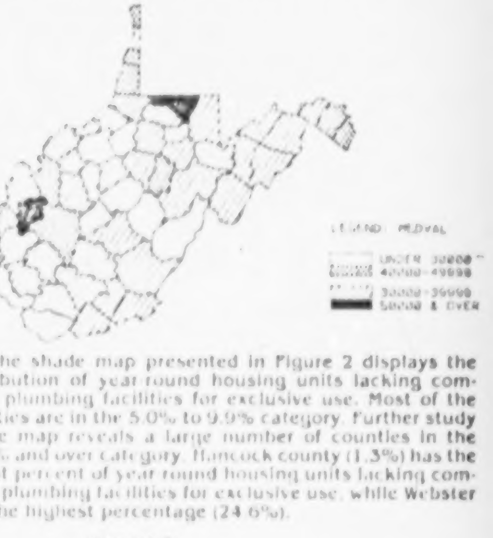
The United States is often referred to as an aging population because the elderly segment of our society is constantly increasing. The same could be said of West Virginia. Both the proportion and the total number of older persons are growing at an increasingly rapid rate. If the current low birth rates continue, it is likely that the proportion of older people within West Virginia will continue to increase. Therefore, there will be proportionately fewer people in the prime productive years compared to the number of older persons. Such trends have implications for the economic viability of the State and its social programs.

SELECTED 1980 HOUSING DATA RELEASED IN SPECIAL REPORT

In the supplementary housing report HC80-S1-1 recently released by the Census Bureau (see page 1), Putnam, Monongalia and Kanawha counties are shown as having the highest median $ values for owner occupied housing units in West Virginia. Table 1, which was taken from the Bureau's report, gives the median $ values for owner occupied housing units in these three counties as $52500, $50200, and $47800 respectively (see last page). The counties having the lowest median $ value for owner occupied units are McDowell, Webster, and Clay with median values of $15600, $21300, and $21700 respectively. The shade map in Figure 1 shows that the majority of counties fall into the $30000-$39900 median value range.

FIGURE 1

1980 CENSUS RESULTS
MEDIAN $ VALUE OF OWNER OCCUPIED HOUSING UNITS
WEST VIRGINIA COUNTIES



The shade map presented in Figure 2 displays the distribution of year round housing units lacking complete plumbing facilities for exclusive use. Most of the counties are in the 5.0% to 9.9% category. Further study of the map reveals a large number of counties in the 15.0% and over category. Hancock county (1.3%) has the lowest percent of year round housing units lacking complete plumbing facilities for exclusive use, while Webster has the highest percentage (24.6%).

CHAPTER NINE

West Virginia

Recreation

ACCOMMODATIONS IN STATE PARKS AND FOREST

LODGE AND CABIN RESERVATIONS

Reservations are made by calling or writing the park or forest directly, or by calling a toll free number for the central office in Charleston. From the central office reservations can be made or a direct connection made to the park or forest for reservations.

To reach any West Virginia State Park or Forest with a lodge or cabins dial 1-800-CALL-WVA (1-800-225-5982). The toll free line may be used in West Virginia or any state in the continental U.S. It is open from 8:30 a.m. to 9:00 p.m. Monday through Friday and Saturday from 9:00 a.m. to 5:00 p.m., except on national and state holidays.

When making cabin reservations for four nights or more, a deposit of one half the rental fee is required with the remainder due upon arrival; the full rental fee is required for three nights or less. For any lodge room, the first night's charge is required as a deposit. If you make your reservation by telephone, you will have ten days in which to make payment, unless it is a last minute reservation. In case of cancellations, deposits will be returned (except for a $15 handling fee for cabins) if notice is given at least 30 days in advance for cabins and 48 hours in advance for lodge rooms.

Only weekly cabin reservations are taken for the second Monday in June through Labor Day. Weekend reservations in the lodges must be for a minimum of two days from May 1st through October 31st.

CAMPING RESERVATIONS

While most campsites are reserved on a first come, first served basis, up to 25% of the sites at Babcock, Beech Fork, Blackwater Falls, Holly River, North Bend, Pipestem and Watoga State Parks are available for reservations. Accepted in writing only, reservations must be made at least 14 days in advance and for a minimum of two, but not to exceed a maximum of 14 nights. In addition to the usual fee, a $5 handling fee will be charged. For further information and reservation forms, contact the aforementioned parks directly.

CHAPTER TEN

West Virginia

Taxes

WEST VIRGINIA, 1987

BUSINESS TAXES

Beginning July 1, 1987, the Business and Occupation Tax will be eliminated for all taxpayers except utilities and will be replaced with a Severance Tax and a Business Franchise Tax. A Telecommunications Tax will replace the Carrier Income Tax and will be imposed on those companies engaged in the telecommunications business. Corporations will also be subject to the Corporation Net Income Tax.

A. The Business Franchise Tax which will go into effect on July 1, 1987 will be imposed on the net equity of every partnership, subchapter S corporation or corporation doing business in West Virginia. The actual tax base from which the tax liability will be computed is the average of the total of the par value of common and preferred stock plus retained earnings and paid-in or capital surplus less treasury stock. The net equity of a multistate business will be apportioned using a four-factor formula with a payroll factor, a property factor, and a double-weighted sales factor. The tax will be equal to $50 or 0.55 percent of the tax base, whichever is greater.

The Business Franchise Tax is a tax on the privilege of doing business in West Virginia and applies to all domestic corporations, corporations which have a commercial domicile in West Virginia, and foreign or domestic corporations or partnerships which lease property or do business in West Virginia, except those engaged in the activity of agriculture or farming. The following organizations are exempt from this tax:

1. businesses which are not corporations or partnerships, such as sole proprietors or self-employed persons;
2. corporations and organizations which are exempt from federal income tax;
3. insurance companies which pay a premium tax in West Virginia;
4. production credit associations organized under the federal "Farm Credit Act of 1933";
5. some trusts;
6. some credit unions, and
7. political subdivisions or instrumentalities of West Virginia.

Certain credits can be taken against Business Franchise Tax liability. They are as follows:

1. a taxpayer may take a credit equal to the amount of Business Franchise Tax liability multiplied by the percentage which gross income subject to Severance Tax is of total gross income,
2. a parent corporation may take credit for its proportional share of business franchise taxes paid by a partnership in which it is a member or by a subsidiary corporation if a consolidated return is not filed, and
3. certain banks and financial institutions may take a credit equal to the amount of property tax liability on bank shares.

BUSINESS TAXES, continued

A taxpayer may also take a deduction equal to the amount of Business Franchise Tax liability multiplied by the percentage which government obligations and obligations secured by residential property are to the total assets of the corporation.

B. The Corporation Net Income Tax is imposed at a rate of 9.75 percent of taxable income effective July 1, 1987. This tax is imposed on every corporation engaging in business in this State or deriving income from property, activity or other sources in this State. A corporation engaged in business activity both in West Virginia and outside the State must allocate and apportion its income on the basis of property, payroll and sales in West Virginia as compared to the total property, payroll and sales of the corporation. For tax years ending after July 8, 1985, a corporation must apportion its income by a four-factor formula which includes a property factor, a payroll factor and a double-weighted sales factor. A taxpayer has the option of taking a credit against its Corporation Net Income Tax liability for the amount of Severance Tax due, but the credit cannot reduce the total primary Corporation Net Income Tax liability by more than 50 percent. If this credit is taken, then the Severance Tax due is added to the taxpayer's federal taxable income in calculating West Virginia taxable income. In lieu of taking the credit, the taxpayer may choose to use the Severance Tax due as a deduction from its West Virginia taxable income. Other credits which may reduce Corporation Net Income Tax liability are the Credit for Hiring the Unemployed; the Credit

Business Taxes, continued

for Reducing Utility Payments to Low-income Families; the Credit for Hiring Vietnam Veterans; Korean Veterans and Disabled Veterans; the Credit for Reducing Telephone Charges to Low-income Families; the Credit for Coal-Coking Facilities; the Enterprise Zone Credit; the West Virginia Capital Company Credit; and the Business Investment and Jobs Expansion Credit.

C. The Severance Tax will be imposed on producers and certain processors of natural resources beginning July 1, 1987. The Severance Tax is very similar to the Business and Occupation Tax on natural resource production. The only significant change is that the tax base will include the processing and treatment of natural resource products as part of the production process. Therefore, these processes will be taxed at the production tax rate.

The tax is levied on gross proceeds of sales. A business subject to the Severance Tax that purchases raw natural resources and processes them into commercially useable products pays tax only on the value added in the processing.

The tax rates on natural resources except timber and new natural gas wells will change each year until July 1, 1992 when the tax rate will be 4.0 percent on all natural resource production except timber. The following chart reflects the rate changes from July 1, 1987 until July 1, 1992.

Business Taxes, continued

	7/1/87–6/30/88	7/1/88–6/30/89	7/1/89–6/30/90	7/1/90–6/30/91	7/1/91–6/30/92	After 6/30/92
Coal*	3.85	3.88	3.91	3.94	3.97	4.0
Limestone/Sandstone	2.2	2.56	2.92	3.28	3.64	4.0
Oil	4.34	4.272	4.204	4.136	4.068	4.0
Sand, Gravel and Other Mineral Products Not Quarried or Mined	4.34	4.272	4.204	4.136	4.068	4.0
Timber	2.5	2.5	2.5	2.5	2.5	2.5
Natural Gas from Wells Drilled or Placed in Service After June 30, 1987	4.0	4.0	4.0	4.0	4.0	4.0
Other Natural Gas	6.5	6.0	5.5	5.0	4.5	4.0
Other Natural Resources	2.86	3.088	3.316	3.544	3.772	4.0

*This rate includes the additional severance tax on coal to benefit counties and municipalities.

Severance Tax liability can be applied as a credit against Business Franchise Tax liability and against up to 50 percent of Corporation Net Income Tax liability.

D. The Telecommunications Tax will be imposed on all telephone, telegraph and other telecommunications companies as of July 1, 1987. Tax liability will be equal to 4 percent of the sum of gross income from business beginning and ending within the State and gross income apportioned to the State from business that either begins or ends within the State.

BUSINESS INVESTMENT AND JOBS EXPANSION CREDIT

The Business Investment and Jobs Expansion Credit (Super Credit) can be used to offset tax liability for various business taxes. In order for a firm to qualify for the Business Investment and Jobs Expansion Credit, it must invest in new property and hire a specified number of new employees. The Business Investment and Jobs Expansion Credit may only be used to reduce the tax liability apportioned to the investment. The apportionment percentage is equal to the wages of the new employees divided by the total wages of all West Virginia employees. The amount of Business Investment and Jobs Expansion Credit allowed depends upon the number of new jobs directly attributable to the qualified investment. If at least 50 new jobs are created, the allowable credit is 50 percent of the qualified investment. The applicable percentage increases to 60 percent if at least 280 jobs are created. For each additional 240 new employees the percentage increases by 10. A maximum 90 percent credit is allowed for job increases of 1,000 or more. The resulting Business Investment and Jobs Expansion Credit allowed is applied over a 10-year period at a rate of 10 percent per year.

The Business investment and Jobs Expansion Credit may be used to offset up to 80 percent of the tax liability apportioned to the qualified investment for the following State taxes:

Business and Occupation Tax on Utilities,
Business Franchise Tax,
Telecommunications Tax,
Severance Tax,
Corporation Net Income Tax, and
Personal Income Tax.

In addition, up to 80 percent of the ad valorem property taxes apportioned to the investment may be rebated by the State through additional credit against the remaining 20 percent of tax liability for Business Franchise Tax, Severance Tax, Telecommunications Tax, Business and Occupation Tax on Utilities, Corporation Net Income Tax and Personal Income Tax attributable to the qualified investment. Up to 20 percent of the Workers' Compensation premiums and up to 80 percent of the Unemployment Insurance taxes directly attributable to the new jobs created may also be rebated against the taxes listed above.

The following chart indicates the order in which the Business Expansion and Jobs Investment Credit must be used against the various tax liabilities. Depending upon the amount of Business Investment and Jobs Expansion Credit available, a firm may be able to reduce only part of its tax liability or it may possibly offset all of its various tax liabilities if sufficient credit is available. No carry-forward to a subsequent tax year or carry-back to a previous tax year is allowed. Any unused credit is forfeited.

Order of Credit Application for Business Investment and Jobs Expansion Credit (After June 30, 1987)

Up to 80% of Business and Occupation Tax on Utilities attributed to qualified investment

Up to 80% of Severance Tax attributed to qualified investment

Up to 80% of Telecommunications Tax attributed to qualified investment

Up to 80% of Business Franchise Tax attributed to qualified investment

Up to 80% of Corporation Net Income Tax or Personal Income Tax attributed to qualified investment

Up to 80% of Property Tax and Unemployment Insurance Tax and 20% of the Workers' Compensation premiums rebated against the remaining 20% of Severance Tax, Telecommunications Tax, Business Franchise Tax, Corporation Net Income Tax or Personal Income Tax attributed to qualified investment

Any rebate that is still available after the remaining 20% of the taxes has been offset may be carried forward from year to year until used or until the twelfth tax year after the tax year in which the qualified investment was placed in service.

Business Taxes, continued

A tax credit is also allowed under the Business Investment and Jobs Expansion Credit when a corporation moves its corporate headquarters to West Virginia from a location outside of the State. The amount of credit allowed depends on the number of new jobs created in West Virginia by the relocation. If the relocation creates at least 15 new jobs but less than 50 new jobs, then the amount of credit is equal to 10 percent of the corporation's adjusted qualified investment in moving its corporate headquarters to West Virginia. If the relocation creates at least 50 new jobs, or if the corporate headquarters relocation is part of a business development project and the total business development project results in at least 50 new jobs, the amount of allowable credit will be determined by multiplying the new jobs percentage by the adjusted qualified investment or by using the 10 percent amount at the taxpayers' option.

Qualified investment is the taxpayers' investment in real and personal property purchased for purposes of business expansion in this State plus the amount of the taxpayer's reasonable and necessary expenses incurred in moving its corporate headquarters to this State. Reasonable and necessary expenses of relocation include such items as expenses incurred by the corporation to break a lease for its present corporate headquarters; the cost of physically moving the tangible personal property of the corporation from its existing headquarters in West Virginia, and the cost of moving the personal effects of its employees who work at the corporate headquarters to West Virginia if such expenses are paid by the corporation.

Also qualifying for the Business Investment and Jobs Expansion Credit are projects in which one company makes the capital investment and has some employees, but as a result of the project, other new businesses are created or new jobs are created. In this event, new jobs created must be within a seventy-five mile radius of the basic capital investment. The allowable credit is limited to 50 percent of the qualified investment. The amount of qualified investment would depend upon the qualified investment in the primary aspect of the project as well as the qualified investment, if any, of the other qualifying participants. The amount of allowable Business Investment and Jobs Expansion Credit is allocated among the participants in the qualified project in such manner as they agree.

Additional credit may be allowed for a project in which the initial capital investment created at least 50 new jobs and, subsequent to the original capital investment being made, additional capital investment is made which was contemplated as being necessary at the time the original investment was made. The taxpayer must submit a written business facility development plan which shows that qualified investment placed in service or use in the first year would not have been made without the expectation of making the subsequent investment in order for that additional investment to qualify.

As of July 12, 1987, small businesses may qualify for the Business Investment and Jobs Expansion Credit if they create at least 10 new jobs. In order to qualify for this credit, small businesses may not have over $5 million in gross sales per year and must have a median payroll of at least $11,000 per employee.

Business Taxes, continued

BUSINESS REGISTRATION FEE

All persons (whether corporations, partnerships or individuals) who engage in business in West Virginia must obtain a Business Registration Certificate at the cost of $15 for each location where business activity is conducted. Businesses which generate gross income of less than $4,000 are exempt from payment although they must still file for and obtain a certificate. Transient vendors must also obtain a Business Registration Certificate from the State Tax Department before conducting business or commencing operations in the State.

CORPORATION CHARTER TAX

Each corporation which does business in West Virginia must pay an annual license tax on its charter. Domestic corporations pay this tax at an appropriate prescribed rate based on authorized capital stock. Foreign corporations pay the tax in like manner at rates based on the proportion of their issued and outstanding capital stock which is represented by their property owned and used in the State. The Secretary of State collects the first year's assessment upon application for a certificate of incorporation; thereafter, the annual tax is collected by the State Tax Commissioner.

Although nonprofit corporations are exempt from this annual charter tax, all foreign corporations and each domestic corporation which has its principal place of business outside the State must pay an annual fee of $10 to the Secretary of State as attorney-in-fact for such corporation.

Business Taxes, continued

SECRETARY OF STATE'S FEE

Both foreign and domestic corporations doing business in the State of West Virginia must register with the West Virginia Secretary of State and pay an Attorney Fee and Certificate Fee.

UNEMPLOYMENT COMPENSATION TAXES

Levied on employers only, the various rates are applied to the first $8,000 of wages paid to each employee during a calendar period.

WORKER'S COMPENSATION FUND

Subscriber's premium rates, per $100 of all employees' gross earnings, vary among industry groups.

GENERAL PROPERTY TAXES

Property taxes are assessed by county assessors and collected by county sheriffs. Each county, municipality and board of education can impose its own rate of property taxation. These rates can vary within counties depending on the class and location of the property.

HOMESTEAD EXEMPTION

Persons 65 years of age or older or totally and permanently disabled may receive $20,000 exemption on the assessed value of their property. They must

Business Taxes, continued

apply between July 1 and October 1 to the county assessor's officer for eligibility.

MOTOR VEHICLE REGISTRATION FEES AND TAXES

A certificate of title as well as an annual license fee is required. Rates vary according to size and value of vehicle. Fees are required for certification of title and for registration of motor vehicles. The registration fee varies according to the size and type of vehicle. A five percent tax on the value of the vehicle is levied on the privilege of affecting the certification of title of most motor vehicles.

CONSUMER SALES AND USE TAX

The rate is five percent on the gross proceeds of taxable retail sales, but certain items such as food and prescription drugs are exempt. As of July 1, 1987, many businesses which were previously exempt from Consumer Sales Tax may have to pay the tax on some or all of their purchases.

CIGARETTE TAX

The rate is 17 cents per package of 20 cigarettes.

GASOLINE TAX

The rate is 10.5 cents per gallon.

Business Taxes, continued

SOFT DRINKS TAX

The Soft Drinks Tax is an excise tax levied upon the sale, use, handling or distribution of bottled soft drinks, syrups and powder bases prepared for mixing soft drinks, whether manufactured within or outside West Virginia. It is levied for the purpose of providing revenue for the construction, maintenance and operation of the four-year school of medicine, dentistry and nursing at West Virginia University.

The rates of the tax are as follows:

On bottled soft drinks
- 1 cent on each 16.9 fluid ounces and any fraction of that amount, or
- 1 cent on each ½ liter and any fraction of that amount;

On soft drink syrup
- 80 cents on each gallon and, on each fractional part of a gallon, the same fractional part of 80 cents, or
- 84 cents on each 4 liters and, on any fractional part of 4 liters, the same fractional part of 84 cents;

On dry mixture used for making soft drinks
- 1 cent on each ounce and any fraction of that amount, or
- 1 cent on each 28.35 grams and any fraction of that amount.

Source: West Virginia State Tax Department, Research Division.

PERSONAL INCOME TAX

The graduated scale of rates is applied to the modified adjusted gross income of all resident individuals, estates and trust and on the West Virginia income of nonresidents. Rates range from 3.0% to 6.5%. The following chart lists the rate structure in greater detail.

West Virginia Personal Income Tax
Tax Rate Schedule
(Effective July 1, 1987)

Income Over-But Not Over	Tax Liability	Plus	of Excess Over
$ 0 - 10,000	$ 0	3%	$ 0
10,000 - 25,000	300	4%	10,000
25,000 - 40,000	900	4.5%	25,000
40,000 - 60,000	1,650	6%	40,000

WEST VIRGINIA WATERWAYS

Source: U.S. Corps of Engineers

West Virginia is one of only 20 states in the country with navigable inland waterways. Concentrations of industry found in West Virginia's commercial river valleys prove once again the importance of river commerce to the State's economy.

The Ohio, Monongahela and Kanawha rivers are the State's three largest waterways. Approximately 200 million tons of commodities are shipped via the Ohio River and its navigable tributaries each year, and the Ohio River Port of Huntington, WV, now ranks as the fourth largest inland port in the country.

Water transportation is an excellent method of transportation for bulk commodities. Because shipping by water is one of the most economical methods of transportation, industry located on or near the State's rivers can realize major savings.

Many miles of navigable waterways have been made possible by the continuous work of the United States Army Corps of Engineers in the development of river transportation facilities and flood control projects. The Corps has completed extensive studies on improving the Ohio River's Gallipolis Locks and Dam, which will alleviate future traffic congestion and further enhance navigable conditions throughout the Ohio River system.

CHAPTER TWELVE

West Virginia

Miscellaneous

WEST VIRGINIA
STATISTICS

Area (sq. mi.) land and water	24,282.45
Population (1980)	1,949,644
Counties	55
Senatorial Districts	17
Congressional Districts	4
Magisterial Districts	281
Judicial Circuits	31
Voting Precincts	2,242
Members of House of Delegates	100
Members of State Senate	34

Youngest County in State	Mingo (formed in 1895)
Oldest County	Hampshire (formed in 1754)
Smallest County	Hancock (area 88.58 sq. mi.)
Largest County	Randolph (area 1,046.34 sq. mi.)
Highest Point in State	Spruce Knob, Pendleton County (elev. 4,861 ft.)
Lowest Point in State	Harpers Ferry, Jefferson County (elev. 247 ft.)
Geographical Center of State	near Sutton, Braxton County
Center of Population	near Gassaway, Braxton County

State officials elected by the people are: Governor, Secretary of State, Auditor, Treasurer, Agriculture Commissioner, Attorney General, and five members of the Supreme Court of Appeals.

Cabinet officers are appointed by the Governor with the advice and consent of the Senate, and serve at the will of the Governor.

LABOR REGULATIONS

The Department of Labor, created by the Legislature in 1889 to protect and promote the safety and prosperity of the citizens of West Virginia, provides services through three divisions.

(1) The Wage and Hour Division enforces the state minimum wage law and wage payment and collection law; issues the fair minimum wage rates for each county for public construction of highways, buildings and other heavy construction; enforces limitations on use of detection of deception devices; approves issuance of age certificates and work permits to minors by school authorities; investigates and approves the licensing of private employment agencies.

(2) The Weights and Measures Division tests and approves all measuring and weighing devices used in commerce; enforces law pertaining to fair and accurate packaging and labeling of products; enforces business sale laws and laws regulating upholstered furniture and bedding; serves as state designee for the U. S. Consumer Product Safety Commission; and operates a Measurement Laboratory/Calibration Station.

(3) The Safety and Boiler Division offers safety and health consultation services to employers in order to promote employee safety and health; tests and certifies all steam boilers annually; enforces the hazardous chemicals "right-to-know" law; and provides safety training.

The Department also conducts an annual occupational injury and illness survey in coordination with the United States Bureau of Labor Statistics and maintains a labor reference library. The Commissioner will act as a mediator or arbitrator upon request of both labor and management.

CRIME IN WEST VIRGINIA

ANNUAL REPORT SYNOPSIS

1985

POPULATION:	
TOTAL	1,936,000
RURAL	1,182,703
MUNICIPAL	753,297

LAW ENFORCEMENT EMPLOYEES:	
TOTAL	3,991
SWORN OFFICERS	2,790
CIVILIANS	1,201

INDEX CRIME VOLUME:	
TOTAL	42,538
VIOLENT	3,214
MURDER	71
FORCIBLE RAPE	359
ROBBERY	715
FELONIOUS ASSAULT	2,069
NON-VIOLENT	39,324
BREAKING AND ENTERING	11,634
LARCENY-THEFT	24,520
MOTOR VEHICLE THEFT	3,170

INDEX CRIME TIME FREQUENCIES:	
TOTAL	1 EVERY 12.4 MINUTES
VIOLENT	1 EVERY 2.7 HOURS
MURDER	1 EVERY 5.1DAYS
FORCIBLE RAPE	1 EVERY 1.0 DAYS
ROBBERY	1 EVERY 12.3 HOURS
FELONIOUS ASSAULT	1 EVERY 4.2 HOURS
NON-VIOLENT	1 EVERY 13.4 MINUTES
BREAKING AND ENTERING	1 EVERY 45.2 MINUTES
LARCENY-THEFT	1 EVERY 21.4 MINUTES
MOTOR VEHICLE THEFT	1 EVERY 2.8 HOURS

INDEX CRIME RATE PER 100,000 RESIDENTS:	
TOTAL	2,197.2
VIOLENT	166.0
MURDER	3.7
FORCIBLE RAPE	18.5
ROBBERY	36.9
FELONIOUS ASSAULT	106.9

Crime in West Virginia, Annual Report Synopsis, 1985, continued

NON-VIOLENT	2,031.2
BREAKING AND ENTERING	600.9
LARCENY-THEFT	1,266.5
MOTOR VEHICLE THEFT	163.7

INDEX CRIME CLEARANCES (RATES):	
TOTAL	11,155 (26.2%)
VIOLENT	2,129 (66.3%)
MURDER	70 (98.6%)
FORCIBLE RAPE	272 (75.8%)
ROBBERY	266 (37.2%)
FELONIOUS ASSAULT	1,523 (73.6%)
NON-VIOLENT	9,026 (22.9%)
BREAKING AND ENTERING	2,322 (20.0%)
LARCENY-THEFT	5,859 (23.9%)
MOTOR VEHICLE THEFT	845 (26.7%)

INDEX CRIME ARRESTS:	
TOTAL	10,603
VIOLENT	1,917
MURDER	81
FORCIBLE RAPE	184
ROBBERY	365
FELONIOUS ASSAULT	1,287
NON-VIOLENT	8,686
BREAKING AND ENTERING	2,418
LARCENY-THEFT	5,736
MOTOR VEHICLE THEFT	532

VALUE OF PROPERTY STOLEN:	
TOTAL STOLEN	$30,860,646
TOTAL RECOVERED	$10,894,394 (35.3%)

LAW ENFORCEMENT OFFICERS:	
KILLED	2
ASSAULTED	174
(WITH PERSONAL INJURY)	48 (27.6%)

ARSON OFFENSES (VALUE OF PROPERTY DAMAGED):		
TOTAL	639	$ 8,288,812
STRUCTURAL	376	$ 5,367,547
MOBILE	215	$ 2,811,200
OTHER	48	$ 110,065

THIS SYNOPSIS OF CRIME IN WEST VIRGINIA FOR 1985 PRESENTS SIGNIFICANT INFORMATION FOR THE YEAR TO PROVIDE READY REFERENCE TO PERSONS NOT PARTICULARLY INTERESTED IN OR IN NEED OF DETAILED STATISTICS OR COMPARISONS.

INDUSTRIAL PARKS

The State of West Virginia is actively involved in a program which aids local communities in the acquisition and development of community owned industrial parks. New parks are being developed in an on-going program to assure close community cooperation for new and expanding industry.

*Revised
†Estimated

NOTE: Ohio teacher salaries reported for 1984-85 and 1985-86 do not include supplemental pay. Texas: Previous estimates of average teacher salaries did not take into account career ladder supplements of approximately 70,000 teachers who received supplements of between $1,500 to $2,000 for excellence in teaching.

Utah: Average classroom teacher salaries do not include compensation provided through the state-funded career ladder program, estimated at average of $858 in 1985-85 and $1,695 for 1985-86.

Statistical Abstract of the United States, 1986.

A DROP IN THE DROPOUT RATE

The dropout rate for public high schools has edged downward, with 25.9 percent of the freshman class of 1980 absent on graduation day four years later, new figures from the Department of Education show.

The dropout rate stood at 28.1 in 1980 and the rate has fallen each year since. In the largest metropolitan areas, it ofter runs 40 percent or higher.

Source: NEA, "Rankings of the States, 1986," Table B-2.

STATE SCHOOLS THAT SPEND MOST

State colleges and universities spend $40 billion, or 13 percent of total general outlays by the states, in fiscal 1984.

The Department of Commerce data generally show smaller outlays in Eastern states, where many private colleges help ease the pressure, and higher spending in the West, where more of the population is of school age.

Spending per person and per $1,000 of personal income:

	Per Capita spending	Per $1,000 of income
Alaska	$569	$34.51
Delaware	$335	$26.79
North Dakota	$329	$28.43
Wyoming	$301	$25.10
New Mexico	$298	$31.42
Utah	$292	$33.18
Vermont	$276	$27.90
Hawaii	$271	$22.71
Iowa	$257	$24.09
Washington	$252	$20.93
Colorado	$248	$19.63
Minnesota	$245	$20.69
Wisconsin	$237	$20.90
Arizona	$228	$22.03
Alabama	$223	$24.30
Oklahoma	$220	$20.08
Texas	$219	$19.02
Kansas	$217	$17.78
North Carolina	$216	$22.38
California	$215	$16.52
Louisiana	$214	$20.98
Indiana	$210	$20.12
Michigan	$209	$18.24
Nebraska	$208	$18.67
Virginia	$208	$17.47
Oregon	$203	$18.99
Idaho	$200	$21.15
Montana	$196	$19.83
South Carolina	$196	$21.53
Kentucky	$187	$19.98
Rhode Island	$186	$16.04
South Dakota	$185	$18.95
Maryland	$178	$13.86
Ohio	$177	$15.81
Georgia	$168	$16.53
Maine	$168	$17.21
West Virginia	$166	$17.99
Mississippi	$164	$20.31
Tennessee	$157	$16.57
Nevada	$152	$12.47
New Hampshire	$148	$12.53
Arkansas	$147	$16.59
New York	$141	$10.88
Illinois	$140	$11.31
Missouri	$133	$12.21
Connecticut	$130	$ 8.79
Florida	$121	$10.71
New Jersey	$119	$ 8.45
Massachusetts	$110	$ 8.32
Pennsylvania	$ 90	$ 7.87

1/ Error ranges are shown at the 90-percent confidence level.

2/ NOTE: The States which compose the census regions and divisions are:

Northeast Region:

New England Division: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

Middle Atlantic Division: New Jersey, New York, and Pennsylvania.

Midwest Region:

East North Central Division: Illinois, Indiana, Michigan, Ohio, and Wisconsin.

West North Central Division: Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

South Region:

South Atlantic Division: Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia.

East South Central Division: Alabama, Kentucky, Mississippi, and Tennessee.

West South Central Division: Arkansas, Louisiana, Oklahoma, and Texas.

West Region:

Mountain Division: Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming.

Pacific Division: Alaska, California, Hawaii, Oregon, and Washington.

UNITED STATES
PROJECTED TWENTY FASTEST GROWING OCCUPATIONS
1982 - 1995

Occupation	Percent Growth in Employment
Computer Service Technician	96.8
Legal Assistant	94.3
Computer Systems Analyst	85.3
Computer Programmer	76.9
Computer Operator	75.8
Office Machine Repairer	71.7
Physical Therapy Assistant	67.8
Electrical Engineer	65.3
Civil Engineering Technician	63.9
Peripheral EDP Equipment Operator	63.5
Insurance Clerk, Medical	62.2
Electrical and Electronic Technician	60.7
Occupational Therapist	59.8
Surveyor Helper	58.6
Credit Clerk, Banking and Insurance	54.1
Physical Therapist	53.6
Employment Interviewer	52.5
Mechanical Engineer	52.1
Mechanical Engineering Technician	51.6
Compression and Injection Mold Machine Operator, Plastics	50.3

Note: Includes only detailed occupations with 1982 employment of 25,000 or more. Data for 1995 are based on moderate-trend projections.

CHAPTER FIFTEEN

West Virginia-U.S. Comparison

Energy/Natural Resources

Value of nonfuel mineral production in the United States and
principal nonfuel minerals produced in 1984

State	Value (Thousands)	Rank	Percent of U.S.	Principal Minerals, in Order of Value
Alabama	$ 409,841	22	1.77	Cement, stone (crushed), lime, clays
Alaska	88,683	42	.38	Sand and gravel (construction),stone (crushed), gold, cement
Arizona	1,483,479	5	6.41	Copper, sand and gravel (construction), cement, molybdenum
Arkansas	272,628	27	1.18	Bromine, cement, stone (crushed), sand and gravel (construction)
California	2,003,445	1	8.66	Cement, boron minerals, sand and gravel (construction), stone (crushed)
Colorado	436,082	20	1.88	Molybdenum, cement, sand and gravel (construction), stone (crushed)
Connecticut	79,696	43	.34	Stone (crushed), sand and gravel (construction), feldspar, sand and gravel (industrial)
Delaware	[1]2,813	50	.01	Magnesium compounds, sand and gravel (construction)
Florida	1,510,364	4	6.52	Phosphate rock, stone (crushed), cement, sand and gravel (construction)
Georgia	940,492	7	4.06	Clays, stone (crushed) cement, stone (dimension)
Hawaii	51,247	44	.22	Stone (crushed), cement, sand and gravel (construction), lime
Idaho	412,295	21	1.78	Silver, phosphate rock, molybdenum, gold
Illinois	471,861	18	2.04	Stone (crushed), cement, sand and gravel (construction), sand and gravel (industrial)
Indiana	293,236	25	1.27	Stone (crushed), cement, sand and gravel (construction), lime
Iowa	253,445	29	1.10	Stone (crushed), cement, sand and gravel (construction), gypsum
Kansas	312,010	24	1.35	Cement, salt, stone (crushed), helium (Grade-A)
Kentucky	256,998	28	1.11	Stone (crushed), lime, cement, sand and gravel (construction)
Louisiana	511,470	16	2.21	Sulfur (Frasch), salt, sand and gravel (construction), cement
Maine	37,939	46	.16	Sand and gravel (construction), cement, stone, (crushed), peat
Maryland	241,701	32	1.04	Cement, stone (crushed), sand and gravel (construction), clays
Massachusetts	107,332	39	.46	Sand and gravel (construction), stone (crushed), lime, stone (dimension).
Michigan	1,408,607	6	6.08	Iron ore, cement, magnesium compounds, salt
Minnesota	1,676,247	3	7.24	Iron ore, sand and gravel (construction), stone (crushed), sand and gravel (industrial)
Mississippi	94,178	41	.41	Sand and gravel (construction), clays, cement, stone (crushed)
Missouri	731,897	8	3.16	Cement, lead, stone (crushed), lime
Montana	249,363	30	1.08	Gold, silver, copper, cement
Nebraska	100,368	40	.43	Cement, sand and gravel (construction), stone (crushed), lime
Nevada	615,753	11	2.66	Gold, silver, diatomite, molybdenum
New Hampshire	23,112	47	.10	Sand and gravel (construction), stone (dimension) stone (crushed), clays
New Jersey	156,236	35	.68	Stone (crushed), sand and gravel (industrial), and and gravel (construction), zinc
New Mexico	619,144	10	2.68	Copper, potassium salts, molybdenum, cement
New York	612,490	12	2.65	Cement, stone (crushed), salt, sand and gravel (construction)
North Carolina	451,480	19	1.95	Stone (crushed), phosphate rock, lithium compounds, sand and gravel (construction)
North Dakota	21,794	48	.10	Sand and gravel (construction), lime, salt, clays

Value of Nonfuel Mineral Production Per Capita and Per Square Mile in 1984, by State

State	Area (Sq. Miles)	Population (Thousands)	Value of Mineral Production: Total (Thousands)	Per Square Mile: Dollars	Per Square Mile: Rank	Per Capita: Dollars	Per Capita: Rank
Alabama	51,705	3,990	$ 409,841	7,926	23	103	20
Alaska	591,004	500	88,683	150	50	177	10
Arizona	114,000	3,053	1,483,479	13,013	10	486	3
Arkansas	53,187	2,349	272,628	5,126	30	116	17
California	158,706	25,622	2,003,445	12,624	12	78	25
Colorado	104,091	3,178	436,082	4,190	36	137	15
Connecticut	5,018	3,154	79,696	15,882	7	25	45
Delaware	2,044	613	[1]2,813	1,376	45	5	50
Florida	58,664	10,976	1,510,364	25,746	1	138	14

---

[1] Excludes silt, culm, refuse bank, slurry dam, and dredge production except for Pennsylvania anthracite. Excludes mines producing less than 10,000 short tons of coal during the year.

[2] Calculated by dividing total coal production by the total direct labor hours worked by all employees engaged in production, preparation, processing, development, maintenance, repair, and shop or yard work at mining operations.Excludes office workers. Includes mining operations management and all technical and engineering personnel.

ANNUAL TRENDS

COAL PRODUCTION, IMPORTS, CONSUMPTION, EXPORTS, AND STOCKS

Coal production in the United States has more than doubled in the past 25 years, from 434.3 million short tons in 1960 to 886.1 million short tons in 1985. Based on the projected rise in coal consumption, coal production is estimated to continue increasing at an average annual rate of about 2.3 percent from 1985 through 1995, reaching 985.0 million short tons in 1990 and 1.1 billion short tons in 1995.

Between 1979 and 1980, U.S. coal exports increased by 38.9 percent to 91.7 million short tons; they increased by another 22.7 percent between 1980 and 1981, reaching a record 112.5 million short tons. Coal exports declined to 106.3 million short tons in 1982 and to 77.8 million short tons in 1983, due mainly to the worldwide recession and above-normal stockpiles in many countries, together with strong competition from other coal-exporting countries. U.S. coal exports rose to 92.7 million short tons in 1985 from 81.5 million short tons in 1984. They are projected to decrease to 84.7 million short tons in 1986, and to reach 89.0 million short tons in 1990.

Electric utilities, the major coal-consuming sector, have more than doubled their consumption of coal since 1969. They consumed 310.6 million short tons in 1969 and 693.8 million short tons in 1985. Coal consumption at electric utilities is projected to rise to record levels of 764.0 million short tons in 1990 and 882.0 million short tons in 1995.

Coal consumption at coke plants declined steadily from 1979 to 1983, due to a decrease in demand for steel and an increase in competition from foreign steel producers. The sharpest decline occurred in 1982, when consumption fell from 61.0 million short tons in 1981 to 40.9 million short tons. Coal consumption at coke plants, which totaled 41.1 million short tons in 1985, is projected to decrease to 37.0 million short tons in 1990 and 32.0 million short tons in 1995.

In the other industrial sector, coal consumption totaled 75.4 million short tons in 1985. Consumption in this sector is projected to increase to 76.8 million short tons in 1986, followed by increases to 83.0 million short tons in 1990, and to 87.0 million short tons in 1995. Coal consumption in the residential and commercial sector, which totaled 9.1 million short tons in 1984 but dropped to 7.8 million short tons in 1985, is projected to total 7.8 million short tons in 1986. Coal consumption in the residential and commercial sector is projected to decline to 7.0 million short tons in 1990 and to stay at that level through 1995.

*The Bureau of the Census has revised its State estimates of population for 1980-84 to include explicit estimates of the growth in the number of illegal aliens. Estimates for 1985 are not available from Census on an unrevised basis. The estimates of population used to compute per capita personal income are the 1980-84 unrevised census series and 1985 estimates prepared by the Regional Economic Measurement Division.

1/ Includes operator households.

2/ Includes forest product sales, recreational income, and other farm business-related income. Estimates for 1982 and later include income from custom feeding services.

3/ Includes machine hire and customwork expenses; marketing, storage, and transportation expenses; and miscellaneous expenses. Definitions and data sources for 1978 and later are not directly compatible with those of earlier years.

4/ Includes contract labor expenses, hired labor wages, and Social Security payments.

5/ Uses different data sources for periods before 1979, 1979-83, and 1984 and later. Estimates are not directly compatible among periods.

6/ Excludes operator households.

7/ Cash income less cash expenses and capital consumption.

8/ Gross farm income less rental value of operators' dwellings.

9/ Gross receipts of farms less nonfactor payments, interest, wages to contract and hired labor, and net rent to nonoperator landlords.

10/ Includes off-farm income for members of farm operators' households only.

Note: Regional totals are unweighted averages. Although the District of Columbia is included in this table, it should not be directly compared to the totals for the several states, which include data for large and small counties, cities, school districts, etc. The figures for the District of Columbia should instead be compared to those of other cities and/or SMSA's.

1/ Estimated annual earnings are the average earnings for the month of October multiplied by twelve for all years except 1957. For 1957 the month of April was used.

2/ U.S. total excludes Alaska and Hawaii in 1957 (prior to statehood).

3/ Excluding Alaska and Hawaii.

Note: Amounts shown for U.S. Postal Service represent actual outlays for contractual commitments, while all other amounts shown represent the value of contract actions, and do not reflect Federal Government expenditures. Nonpostal data generally involve only current year contract actions; however, multiple-year obligations may be reflected for contract actions of less than 3 years duration. Foreign procurement contract awards are excluded from United States totals. Foreign award total equals $12,254,625,000, including $8,729,418,000 for the Department of Defense and $3,525,207,000 for all other Federal agencies.

- Represents zero or rounds to zero.

[1] Includes awards to territories not separately exhibited, awards under $25,000 for Department of Defense, awards under $10,000 for all other Federal, and classified location awards (Department of Defense).

CHAPTER NINETEEN

West Virginia-U.S. Comparison

Taxes

Tax Rate Schedules For 1987

Starting in 1987, your taxable income is your gross income subject to tax less all deductions, including an amount equal to the standard deduction. The standard deduction replaces the zero bracket amount, which was incorporated into the tax rate schedules in 1986 and earlier years.

Married Persons Filing Jointly

Taxable income	Tax
$0—$3,000	11% of taxable income
$3,000—$28,000	$330 plus 15% of the excess over $3,000
$28,000—$45,000	$4,080 plus 28% of the excess over $28,000
$45,000—$90,000	$8,840 plus 35% of the excess over $45,000
Above $90,000	$24,590 plus 38.5% of the excess over $90,000

Single Persons

Taxable income	Tax
$0—$1,800	11% of taxable income
$1,800—$16,800	$198 plus 15% of the excess over $1,800
$16,800—$27,000	$2,448 plus 28% of the excess over $16,800
$27,000—$54,000	$5,304 plus 35% of the excess over $27,000
Above $54,000	$14,754 plus 38.5% of the excess over $54,000

Heads of Household

Taxable income	Tax
$0—$2,500	11% of taxable income
$2,500—$23,000	$275 plus 15% of the excess over $2,500
$23,000—$38,000	$3,350 plus 28% of the excess over $23,000
$38,000—$80,000	$7,550 plus 35% of the excess over $38,000
Above $80,000	$22,250 plus 38.5% of the excess over $80,000

PER CAPITA FEDERAL INCOME TAX COLLECTIONS, STATES, 1984

*RTS - Representative Tax System is a hypothetical measure of how much revenue a state could raise if it levied national average tax rates and used tax bases "representative" of most other states. It is calculated by applying national average tax rates in each state to a uniform set of 26 state and local tax bases, and estimating the yield based on the size of the underlying tax bases. Because the size of a state's tax bases is directly affected by the condition of its economy, the capacity measure reflects both the state of the economy and how that translates into the potential revenue-raising ability of each state.

*Tax Wealth - the ability of the states and their local governments to raise revenues from the tax sources available to them.

## - Budget Stabilization Fund included in Ending Balance

0 - Zero Amount

Blank - Amount does not exist.

- Notes:

Figures may not add due to rounding.

State by State Fiscal Position Analysis-Cont.

AK: Figures are not available due to new forcast and the continued dramitic drop on oil prices. Spending is substantially lower than prior year and a deficit is pending.

CO: Due to transfers and reversions, the fiscal year will end in balance.

DC: Cumulative balances include pre-home rule deficits. Other figures are annual.

LA: The negative balance will be offset to an extent by reversions.

MO: Does not reflect cash operating reserve in excess of $130 million.

MS: This figure represents "default" insurance and cannot be spent unless the state ends the fiscal year with a deficit. A cash flow fund of $32 million is not included.

NH: Figures are from the director of finance and represets preliminary and unaudited information.

ND: Deficit to be addressed by legislature in December 1986 at special session or beginning of regular session, January 1987.

OR: Expenditures for the biennium are split arbitrarily, first year = 48 percent, second year = 52 percent.

SC: Budget stabilization fund is to be used to cover any operational deficit.

TX: Fiscal 1986-87 biennial budget expected to be revised in August Special Session to cover a $2.9 billion revenue shortfall.

VA: Capital outlay appropriations for the biennium are contained in the first year of the budget and are subject to carry forward in the second year.

VA: Budget stabilization figure is a biennial figure included in appropriated expenditures and is subject to change in 1987-88 biennium.

WY: Includes an 8 percent reduction in budget authority to spend, but not a cut in appropriations.

Major Taxes and Rates Used by States, continued

NOTES:

(X) Indicates state levies a property tax.
(F) Allows Federal income tax as a deduction.

[a] Local taxes are additional.
[b] Future reduction scheduled under current law.
[c] Alternative methods of calculation may be required.
[d] In Connecticut, New Hampshire, and Tennessee, tax applies to income from intangibles only, at various rates according to type.
[e] Future increases scheduled under current law.
[f] Tax is 3% of adjusted gross income. A supplemental net income tax is imposed at 4%.
[g] A 2-¼% surtax is imposed on taxable income in excess of $25,000.
[h] Deductions limited.
[i] Tax imposed at percent of wholesale value.
[j] Additional 14% surtax is imposed.
[k] Tax of 10% on income derived from intangibles, and 5% on all other income, and an additional 3.75% tax for 1986.
[l] Additional tax on net worth is part of the corporate franchise tax.
[m] Qualified taxpayers may elect to pay alternative taxes at varying rates.
[n] Optional tax of 10.5% of taxpayer's adjusted Federal income tax liability.

Mideast				
Delaware	14			
D.C.	13	X	6	
+Maryland	13*			
New Jersey	25			Includes surtax levied at same % as sales tax & based on average wholesale price. Atlantic City Levies 3¢/pk.; N.Y.City + 8¢.
+New York	21	X2/	4	
Pennsylvania	18	X	6	
Great Lakes				
+Illinois	12*	X2/	5	Chicago levies a 15¢/pk. tax; Cook County levies 8¢/pack tax.
Indiana	10.5	X	5	
Michigan	21	X2/	4	
Ohio	14	X	5	
+Wisconsin	25*	X	5	
Plains				
+Iowa	26	X	4	
+Kansas	24	X	3	
+Minnesota	23*	X	6	
+Missouri	13*	X2/	4.225	Some municipalities and counties levy a tax ranging from 4-7¢/pack.
+Nebraska	18*	X	3.5	
North Dakota	18	X	4	
+South Dakota	23			

State Cigarette Tax Rates, continued

Southeast				
Alabama	16.5	X[2/]	4	Some munic. levy a tax ranging from 1/2-8¢; some cntys. levy tax of 1-4¢.
Arkansas	21			
+Florida	21*	X	5	
Georgia	12	X[2/]	3	
Kentucky	3	X	5	Plus a .1¢ tax/package cigarettes.
Louisiana	16	X	4	
+Mississippi	18*	X	6	
North Carolina	2	X	3	
South Carolina	7	X	5	
Tennessee	13	X	5.5	One city and one county levy a 1¢/pack tax.
Virginia	2.5	X	3	Some municipalities levy a tax ranging from 2-15¢/pack; Arlington & Fairfax counties levy a 5¢/pack tax.
West Virginia	17	X	5	
Southwest				
+Arizona	15*	X	5	
+New Mexico	12*	X	3.75	
+Oklahoma	18*	X	3.25	
Texas	20.5	X	4.125	
Rocky Mountain				
+Colorado	15			
Idaho	9.1	X	4	
+Montana	16*			
+Utah	12*	X	4.625	
Wyoming	8			
Far West				
California	10	X	4.75	
+Nevada	15*	X	5.75	
+Oregon	27			
Washington	23	X	6.5	
+Alaska	16			
Hawaii	27	X	4	Tax is 40% of wholesale price.

+Indicates 1984 legislative action.

*If the federal government allows the 8¢/pack cigarettes surtax (16¢/pack total) to expire on October 1, 1985 as scheduled, these states passed legislation that will automarically increase their state cigarette taxes.

[1/] Local taxes are not included. [2/] Sales taxed net of excise taxes.

STATE INDIVIDUAL INCOME TAX RATES FOR 1985

(As of October 1985)

State	Net Income	Marginal Rate (Percent)	Special Rates Or Features
Alabama	First $1,000 $1,001-$3,000 Over $6,000	2% 4 5	Rates shown are for married persons filing jointly. Single persons, heads of families, married persons filing separately, and estates or trust are taxes at 2% of the first $500 of taxable income 4% on the next $2,500, and 5% on any excess over $3,000. Local income taxes are additional.
Alaska	No tax		
Arizona*	First $1,061 $1,062-$2,122 $2,122-$3,183 $3,184-$4,244 $4,245-$5,305 $5,306-$6,366 Over $6,366	2% 3% less $11 4 less $32 5 less $64 6 less $106 7 less $159 8 less $223	Rates shown are for single taxpayers. For married joint returns, the tax is twice the amount it would be if income were cut in half. Tax brackets, personal exemption, standard deduction, and some credits are adjusted annually to reflect changes in the Consumer Price Index.

State Individual Income Tax Rates, continued

Arkansas	First $2,999	1	
	$3,000-$5,999	2.5	
	$6,000-$8,999	3.5	
	$9,000-$14,999	4.5	
	$15,000-$24,999	6	
	Over $25,000	7	
California*	$0-$1,580	No Tax	Rates shown are for single taxpayers and married filing separately. For joint returns the tax is twice the amount it would be if taxable income were cut in half. Special rate tables for heads of households and fidiciuaries. The tax brackets are adjusted annually for changes in the CA CPI. Community property state in which generally one-half of the community income is taxable to each spouse.
	$1,581-$4,810	1

	$9,631-$12,080	4	
	$12,081-$14,510	5	
	$14,511-$16,930	6	
	$16,931-$19,330	7	
	$19,331-$21,760	8	
	$21,761-$24,180	9	
	$24,181-$26,600	10	
	Over $26,600	11	

State Individual Income Tax Rates for 1985
Continued

State	Net Income	Marginal Rate (Percent)	Special Rates Or Features
Colorado*	$0-$1,420	3	2% surtax on dividend and interest income in excess of $15,000. Except for 1985, tax brackets, personal exemption, and standard deduction adjusted annually by an inflation factor. The brackets take into account a tax reduction credit which reduces the effective rate of tax ½ of 1% in each bracket up to $9,000, multiplied by the annual inflation factor. This credit has been suspended for the 1985, 1986, & 1987 tax years
	$1,421-$2,830	3.5	
	$2,831-$4,250	4	
	$4,251-$5,660	4.5	
	$5,661-$7,080	5	
	$7,081-$8,490	5.5	
	$8,491-$9,910	6	
	$9,911-$11,320	6.5	
	$11,321-$12,740	7	
	$12,741-$14,150	7.5	
	Over $14,150	8	
Connecticut	Tax on dividends, interest, and capital gains only		A tax ranging from 1% on dividends and interest income of $50,000 for $53,999 to 13% on such income over $100,000 is levied. A 7% tax is imposed on all net gains from the sales or exchange of capital assets.

Tennessee	....	6	Yes	—	Corporations are also subject to the tax on dividends and interest.
Texas	No tax				
Utah 2/	....	5	Yes	W	Minimum tax, $100. Worldwide unitary apportionment will be optional effective upon adoption by the federal government of legislation or regulations to fulfill its responsibility for increased administrative assistance and cooperation to promote full taxpayer disclosure and accountability.

State Corporate Income Tax Rates, continued

Vermont	First $10,000 $10,000-$25,000 $25,000-$250,000 Over $250,000	6 7.2 8.4 9	Yes	--	Minimum tax, $75. For tax years beginning on or after January 1, 1988, the tax rates range between 5.5% and 8.25%.
Virginia	....	6	No	--	Decoupled from ACRS but not using pre-1981 depreciation rules.
Washington	No tax				
West Virginia	Under $50,000 Over $50,000	6 7	No	D	Decoupled from ACRS but not using pre-1981 depreciation rules. Imposed a 15% surtax until June 1985. On July 1 1987 the tax rate is 9.75% of taxable income; beginning July 1, 1988, the rate is reduced by 0.15% per year for 5 successive years, such rate to be 9% on and after July 1, 1992. Domestic unitary apportionment is used as a choice of the taxpayer.
Wisconsin 2/	....	7.9	Yes	--	
Wyoming	No tax

State Corporate Income Tax Rates, continued

1/ Allows federal income tax to be deducted on state corporate returns.

2/ Federal income tax is NOT used as a base.

3/ Under the 1981 Economic Recovery Tax Act, the Accelerated Cost Recovery System (ACRS) was adopted by the federal government. This tax change resulted in very rapid depreciation of buildings, machinery, and vehicles. Most states rely on the federal corporate tax as a base for their own corporate tax and therefore would lose significant amounts of revenue if the state conformed to the federal depreciation schedule. ACRS was amended in 1982 under the Tax Equity and Fiscal Responsibility Act. Even under this amended version, the Citizens for Tax Justice estimates that states may lose up to $26 billion from 1983 to 1987 if they comply with ACRS.

4/ W = State adopted worldwide unitary apportionment which also applies to domestic corporations.
D = State adopted domestic unitary apportionment only.
Unitary apportionment with combined reporting apportions corporate net income according to the amount of payroll, property, and sales based in each state. This includes unitary multistate and multinational corporations acting through subsidiaries.

+ Additional local sales tax rates may be applicable. See table on "Use of Local Sales Taxes" for local rates.

Notes

Arkansas: Exempts the first 500 kilowatt hours of electricity per month for residential customers whose income is not more than $12,000 per year.

Connecticut: Clothing less than $75 is exempt. All clothing for children under 10 is exempt.

Kansas: Related income tax credit allowed for senior citizens depending on income level.

Maine: The first 750 KWH per month is exempt.

Maryland: Residential electricity bills are exempt from sales tax, but natural gas bills are not.

Massachusetts: Sales tax applies if an item of clothing is over $175.

Minnesota: Residential use of natural gas or electricity for heating purposes is exempt through the months of November-April.

Missouri: The sales tax will decrease 1/10 of 1% in June 1990.

Nebraska: Sales tax will increase 1% as of January 1, 1987.

Nevada: The state has a mandatory 3.75% county sales tax, which in practice gives the state a sales tax rate of 5.75%.

North Carolina: Exempted food purchased with food stamps. Adopted non-refundable credit on personal income tax to help offset sales tax on food purchases. The credit ranges from $15 to $25 depending on income level. The credit is not available to taxpayers with taxable income greater than $15,000.

North Dakota: Contingent 1 cent sales tax increase if General Fund revenues are less than $393 million by April 30, 1986. Tax would be effective from July, 1986 to March 1987.

Major Features of State Sales Tax, continued

Rhode Island: Sales tax applies for sports clothing.
South Carolina: Adopted a $12.50 income tax credit to help offset the one percent sales tax increase passed in 1984.
South Dakota: Related income tax credit allowed for senior citizens depending on income level.
Utah: Rate decreases to 4.594% on July 1, 1986. Rate decreases to 4.5% on January 1, 1990. Residential utility sales tax reduced from 1.625% to 1.594% from July 1, 1986 through December 31, 1989, and drops to 1.5% on January 1, 1990.
Vermont: The 4.0% tax rate decreases to 3.0% in July 1987.
Wisconsin: Residential use of natural gas or electricity for heating purposes is exempt through the months of November-April.
Wyoming: Related income tax credit allowed for senior citizens depending on income level.

1/ Degree of state taxation of professional and personal services other than utilities, admissions, and transient accommodations is divided into five (5) categories:

1. General taxation of most services (Includes most professional and personal services.);
2. Broad taxation of services (May include taxation of repairs; investment counseling; bank service charges; barber and beauty shops; carpentry; laundry and cleaning; photography; rentals; interior decorating; printing; packing; parking; and bookkeeping and collection services.);
3. Substantial taxation of services (May include taxation of repair services; bookkeeping and collection services; laundry and drycleaning; cable T.V.; parking; and landscaping);
4. Narrow taxation of services; (May include taxation of advertising selected business services, and laundry and dry cleaning.); and
5. No (or little) taxation of additional services.

Hawaii	0.51	0.60	n.a.	0.36	n.a.	0.92	0.81	0.62

Note: These effective rates are for existing FHA insured mortgages only, which represent small and varying percentages (by state) of total single-family homes. The United States average tax rate for 1984 (1.23) indicates that, on average, the property tax on a home with a market value of $100,000 would be $1,230.

n.a.--Data not available.

1/ Effective tax rate is the percentage that tax liability is of the market value of the house.

n.a.--not applicable. More than half of all cities do not have local income or general sales taxes; hence, the concept of "median" does not apply. The median figures for each of the separate state and local taxes is the median figure for that particular tax only, therefore (because no median could be computed for local income and sales taxes), these figures do not necessarily sum to the median figure for combined state-local taxes.

1/ A negative figure indicates a tax refund.

[For assumptions that underlie these figures see following page.]

STATE PERCENTAGE OF STATE-LOCAL GENERAL EXPENDITURE, FROM OWN REVENUE SOURCES, TOTAL AND FOR SELECTED FUNCTIONS, BY STATE AND REGION, FY 1984

A Comparison of Direct Tax Burdens for a Married Couple with Two Dependents, Located in the Largest City in Each State, For Selected Federal and State-Local Taxes, 1982 - Continued

Note: State and Local Income Taxes were computed from information from federal return. If taxpayers had the option of filing jointly or separately on a combined return, the method that resulted in the lowest tax liability was used. For state-local returns that allowed the splitting of income, wage and salary income was split. Nonwage income was assumed to be held jointly. Where allowed, exemptions and deductions were allocated so as to produce the least tax; in instances where this procedure was not allowed, the pro-ration of exemptions and/or deductions according to spousal income was undertaken as state-local tax provisions directed. If a given state grants a deduction or credit for local income, general sales and/or property taxes, this tax provision would be reflected in the state income tax liabililty. In states where property tax relief is granted through the state income tax, this relief would be reflected in a lower income tax liability and not in the property tax figure; only in instances where property tax relief is separate from the state income tax is such tax relief reflected in the lower property tax liability.

State and Local General Sales Taxes were taken from the optional general sales tax tables included in the federal return. Local taxes were added where appropriate.

Local Real Property Tax. Housing values: The median value of residential property (in each city) for families earning $25,000 and $50,000 (from 1980 Census of Housing). These values were multiplied by effective property tax rates from the 1982 Census of Governments and, in the few instances where data were not available from Census, from knowledgeable individuals in the field in that particular city or state.

l Where the Federal share exceeds the State share, the excess will be due to (1) unemployed workers of reimbursable employers, (2) claimants with wage credits under interstate wage combining, and (3) claimants with joint wage credits under UCFE and UCX.

n State law provides a regular duration in excess of 26 weeks.

† Incorrect data reported by Arizona, Arkansas, Mississippi, Nevada, Puerto Rico, and West Virginia.

! Where the Federal share exceeds the State share, the excess will be due to (1) unemployed workers of reimbursable employers, (2) claimants with wage credits under interstate wage combining, and (3) claimants with joint wage credits under UCFE and UCX.

n State law provides a regular duration in excess of 26 weeks.

† Incorrect data reported by Maryland, Puerto Rico, Tennessee, and Vermont.

FOOTNOTES FOR TABLE 12

*Plus employee tax of: 0.5% in *Alaska*, 0.5% in *New Jersey*, (.625% effective 7-1-86), and 0.1% of total wages in *Pennsylvania*.

1. Includes a solvency type tax of: 0.4% stabilization tax and 0.1% extended benefit tax in *Arkansas*; 1.0% in *Connecticut*; 1.5% in *Delaware*; 0.9% in the *District of Columbia*; 0.6% in *Illinois*; 0.09%-1.80% solvency tax plus a 0.02%-0.38% socialized cost charge in *Louisiana*; 1.7% surcharge in *Maryland*; 30% surcharge on contributions due in *Missouri*; 10% surtax in *New Jersey* (expires 6-30-86); 1.0% subsidiary tax in *New York*; 20% surtax in *North Carolina*; flat 0.5% in *Pennsylvania*; 30% of the computed rate in *Rhode Island*; 1.0% in *West Virginia*; and minimum and maximum surtaxes ranging from 0.1% to 3.3%, respectively, in *Wisconsin*.
2. Excludes a surcharge of 0.3% added to each employer's rate if benefits are charged to his account in *Colorado*.
3. Effective 7-1-86 maximum 7.0% and minimum 1.2%.
4. An employer whose paid wages are less than $50,000 during a quarter shall not have a rate above 4.1% for that quarter. A transition option is in effect that will raise this cap to 5.4% by 1989.
5. $8,000 for employers with an experience ratio of less than 0.1%.
6. Includes an advance interest tax of 0.3% in *Pennsylvania*.
7. Includes 0.1% to 1.0% surcharge for negative balance employers.
8. Includes minimum and maximum surtaxes of 0.34% and 2.34%, respectively; also experience rated employers with an approved work sharing plan could have a maximum rate of 9.36%.
9. Maximum includes a 1% surtax for all debit reserve balanced employers or new foreign businesses engaged in construction trades.
10. Includes: 0.5% "minimum safe level," 0.5% advanced interest tax, and 0.6% mutualized tax.
11. Includes 0.1% job service tax.
12. July 1, 1986 estimated minimum 0.1% and maximum 5.4%. No surtax.
13. Preliminary estimate.

State Unemployment Insurance Laws, continued

[1] Weekly benefit amount abbreviated in columns and footnotes as wba; base period, BP; base-period wages, bpw; high quarter, HQ; high-quarter wages, hqw; average annual wage, aaw; average weekly wage, aww; benefit year, BY; calendar quarter, CQ; calendar year, CY; dependent, dep.; dependents allowances, da.; minimum, min.; maximum, max.; quarter, qtr.; week, wk.

[2] Unless otherwise noted, waiting period same for total or partial unemployment. In Ga. no waiting week if claimant unemployed not through own fault. In Iowa the waiting week will be repealed on January 1 of the first CY for which a contribution rate table other than the highest is in effect.

[3] When States use weighted high-quarter, annual-wage, or average weekly-wage formula, approximate fractions or precentages figured at midpoint of lowest and highest normal wage brackets. When da provided, fraction applies to basic wba. In States noted variable amounts above max. basic benefits limited to claimants with specified number of dep. and earnings in excess of amounts applicable to max. basic wba.. In Ind. da. paid only to claimants with earnings in excess of that needed to qualify for basic wba and who have 1-4 deps.. In Iowa, and Ohio claimants may be eligible for augmented amount at all benefit levels but benefit amounts above basic max. available only to claimants in dependency classes whose hqw or aww are higher than that required for max. basic benefit. In Mass. for claimant with aww in excess of $66 wba computed at 1/52 of 2 highest quarters of earnings or 1/26 of highest quarter if claimant has no more than 2 quarters work.

[4] When 2 amounts given, higher includes da.. Higher for min. wba includes max. allowance for one dep.. In D.C., Md., and N.J., same max. with or without dep.

[5] In computing wba for partial unemployment, in States noted full wba paid if earnings are less than 1/2 wba; 1/2 wba if earnings are 1/2 wba but less than wba.

[6] States noted have weighted schedule with percent of benefits based on bottom of lowest and highest wage brackets.

[7] Benefits extended under State program when unemployment in State reaches specified levels; Alaska, Calif., by 50%; Conn. by 13 weeks; Wash. (until Dec. 31, 1986) by 6 wks., and Oreg. (until June 27, 1987) by 25%. In Hawaii benefits extended by 13 weeks when a manmade or disaster causes damage to either the State as a whole or any of its counties and creates an unemployment problem involving a substantial number of persons and families. In P.R. benefits extended by 32 weeks in certain industries, occupations or establishments when special unemployment situation exists. Benefits also may be extended during periods of high unemployment by 50%, up to 13 weeks, under Federal-State Extended Compensation Program.

[8] For claimants with min. qualifying wages and min. wba. When two amounts shown, range of duration applies to claimants with min. qualifying wages in BP; longer duration applies with min. wba; shorter duration applies with max. possible concentration of wages in HQ; therefore highest wba possible for such BP earnings. Wisc. determines entitlement separately for each employer. Lower end of range applies to claimants with only 1 week of work at qualifying wage; upper end to claimants with 18 weeks or more of such wages.

[9] Waiting period compensable if claimant unemployed after 9 consecutive weeks, Mo.; when benefits are payable for third week following waiting period, N.J.; after benefits paid equaling 3 x wba, Tex.; after any 4 weeks in BY, Minn.; after 3d week of total unemployment, (for CY 1986 no benefits will be paid for the waiting week) Ohio.

[10] Or 15 weeks in last year and 40 weeks in last 2 years of aww of $80 or more, N.Y.; 14 weeks of employment and BP wages equal to 20 x the State aww, Mich.. Between January 1, 1986, and December 31, 1987, 20 hrs. in each of 20 wks., Okla..

[11] For N.Y., waiting period is 4 effective days accumulated in 1-4 weeks; partial benefits 1/4 wba for each 1 to 3 effective days. Effective days: fourth and each subsequent day of total unemployment in week for which not more than $180 is paid.

[12] To 55% State aww if claimant has nonworking spouse; 62.4% if he has dep. child, Ill.; 1/19-1/23 up to 65% of State aww for claimants with dep., Iowa; 60% of first $85, 40% of next $85, 50% of balance of individual's aww; max. set at 66-2/3%, Minn. 60% of aww if fund ratio is less than 5.5%; however, the max. wba may not be less than the max. in effect for the previous year, N.C.

[13] Up to 66-2/3% of State aww, La..

[14] Duration can be much less than 26 wks. for individuals with only one BP ER, Okla..

[15] $1,500 in any CQ in current or preceding CY unless otherwise specified.

[16] Max. amount adjusted annually: by same percentage increase as occurs in State aww (Ohio) by $7 for each $10 increase in average weekly wage of manufacturing production workers (Texas).

[17] The min. and max. wba's are frozen indefinitely, La. and Wisc.. The max. wba is frozen until January 1987, Ill., Mich., Mont., and Ohio; until July 1988, W.Va.; and indefinitely, S.Dak..

[18] The wba will be reduced by 5% if the weekly benefit amount is $75 or more, Pa.; wba's over $90 will be reduced to 85% of the computed amount when revenues in the fund are inadequate to pay benefits, Wyo.; the greater of $197 or 60%, 57.5%, 55%, 52.5% or 50% of State aww of the second preceding CY depending on the condition of the fund, Okla.

1/ Includes workers covered by Unemployment Insurance (UI) and Unemployment Compensation for Federal Employees (UCFE) programs.

2/ Data are preliminary.

3/ Percent changes were computed from unrounded average annual pay data and may differ from those computed using data rounded to the nearest dollar.

4/ Includes data for Maryland not shown separately.

5/ Comparable data for Maryland for 1984 and 1985 are not available. See Technical Note for more information.

6/ Based on estimated data for the second, third, and fourth quarters of 1985.

Dist. of Col.	18	16	16	18	21	18	18	16(l)

(a) Generally, the age at which an individual has legal control over own actions and business (e.g. ability to contract) except as otherwise provided by statute. In many states, age of majority is arrived at upon marriage if minimum legal marrying age is lower than prescribed age of majority.

(b) With parental consent. Minimum age for marrying without consent is 18 years in all states, except Mississippi (21 years) and Wyoming (19 years).

(c) As of early 1986. Legislation enacted; may not yet be effective.

(d) Without graduating.

(e) Bond is required if under 18.

(f) Legal procedure for younger persons to obtain license.

(g) To 10th grade, effective with 1986-87 school year.

(h) Statute provides that any unmarried male or female under 18 may marry with consent (usually with order of court granting permission).

(i) Age may be lower for a minor who is living apart from parents or legal guardians and managing own financial affairs, or who has contracted a lawful marriage.

(j) In Colorado and South Dakota, 3.2 beer only.

(k) Unless parent or guardian is able to show child is receiving equivalent instruction.

(l) Younger, if lawfully employed. Connecticut, Iowa, District of Columbia, 14 years; Hawaii, 15 years.

(m) Parental consent not required when female is pregnant or applicants are parents of a living child.

(n) Does not apply to those who have reached age 15 or completed ninth grade, or who otherwise have permission to leave.

(o) Parental consent and judicial consent required.

(p) Mississippi's compulsory attendance statute is being implemented in a staggered fashion (began with 1982-83 school year) until every child who is six years old and has not reached the age of 14 years is covered by the mandatory attendance provision.

(q) Or completion of eighth grade, whichever is earlier.

(r) Parental consent required for ages 16 to 18; judicial approval for individuals under 16.

(s) Does not apply to those who have completed 10th grade and have consent of parents and school officials.

(t) As defined in general obligations (for purposes of contracting) and civil rights codes, 18 years.

(u) In cities having over 4,500 population and union-free school districts.

(v) With certain exceptions.

(w) Under 16, must have parental consent and approval of circuit judge.

*Effective July 1, 1986, minimum age is 21.

This list ranks 75 metropolitan areas by changes in jobs and earnings in the past year and by how these changes relate to national trends

Note: Rankings are determined by weighted average of four variables—change in employment ratio from a year earlier, latest employment ratio relative to U.S. average, change in nonfarm employment and change in weekly earnings of factory workers. City-by-city figures are official reports for February or latest available. Most statistics are for metropolitan areas.

*Statewide figures. **Factory workers' weekly earnings at annual rates.

USN&WR—Basic data: U.S. Dept. of Labor

A LOOK AT BUSINESS ACROSS THE COUNTRY

In Eastern Cities	**Unemployment Rate**	**Nonfarm Employment Feb'85 vs '84**	**Income of Average Factory Worker***	**Factory Workers' Income Compared w/one year ago**	**Construction Activity Compared w/one year ago**

Mississippi	54.6	33	28.7	22	10.8	17
North Carolina	53.2	34	19.2	44	4.3	48
South Carolina	45.7	45	20.2	41	4.9	45
Virginia	43.4	48	16.5	50	4.4	47
Tennessee	53.2	34	28.2	24	10.7	18
UNITED STATES	56.1	(X)	26.8	(X)	9.0	(X)

Note: Data in this table are only for highways with a 55 mph speed limit. Data have not been adjusted for speedometer or equipment errors.

(X) Not applicable.

1. Non-compliance with the 55 mph speed limit by a majority of the vehicles in a state will soon result in reduced federal highway funding.

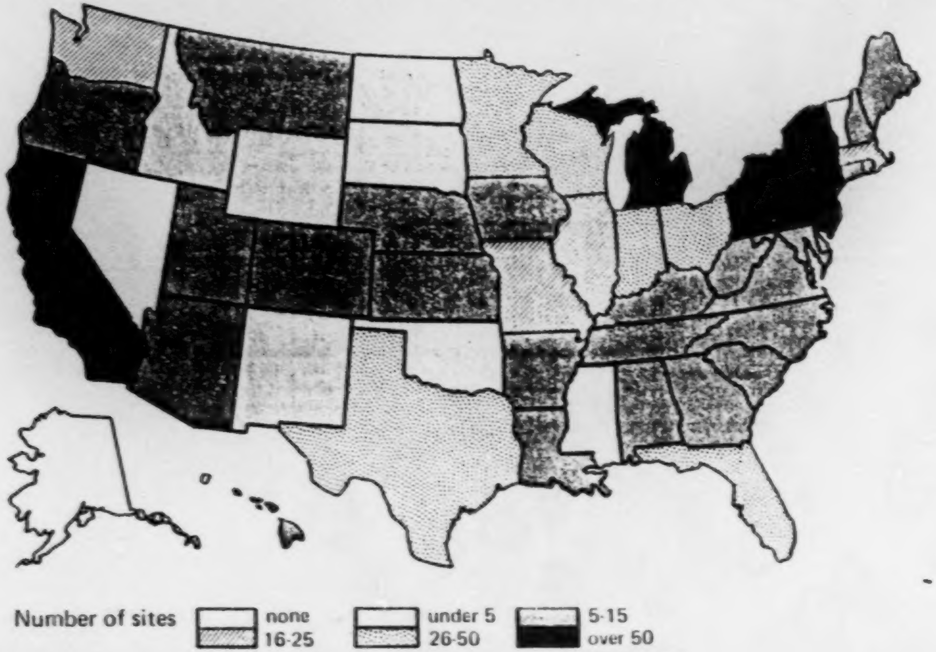
Hazardous Waste Sites (Final and Proposed) - Number of Sites on National Priority List, September 1985

[Represents targeted hazardous waste sites identified for action under the Comprehensive Environmental Response Compensation, and Liability Act of 1980 (also known as "Superfund"). Superfund is a national trust fund (about $1.6 billion) established by Congress for cleaning up environmental problems when the public health or environment is threatened by hazardous wastes improperly disposed of in the past or by spills of hazardous substances]



Total sites in U.S.: 862[1]

[1] Includes eight in Puerto Rico; and one each in American Samoa, Guam, Marianas, and Trust Territories.

THE REGIONAL BALANCE, CONGRESSIONAL SEATS BY REGION

	ACTUAL NUMBER		PROJECTED NUMBER FOR 1990	
	1970	1980	CENSUS BUREAU	NATIONAL PLANNING ASSOCIATION
Northeast	104	95	84	91
North Central	121	113	105	108
South	134	142	152	148
West	76	85	94	88

By 1990 the South and West would have 246 House seats and the North would have only 189, according to the Census Bureau's population projections. Regional shifts in representation would not be as dramatic if the Association's numbers prove accurate. The South and West would have 236 House seats and the North 199.

CONGRESSIONAL GAINERS AND LOSERS: 1980-1990

GAINERS				LOSERS			
CENSUS BUREAU		NATIONAL PLANNING ASSOCIATION		CENSUS BUREAU		NATIONAL PLANNING ASSOCIATION	
Florida	+4	California	+2	New York	-5	New York	-3
Texas	+4	Texas	+2	Pennsylvania	-3	Illinois	-1
Calif.	+3	Alabama	+1	Illinois	-2	Iowa	-1
Arizona	+2	Arizona	+1	Michigan	-2	Kansas	-1
Arkansas	+1	Florida	+1	Ohio	-2	Michigan	-1
Colorado	+1	Georgia	+1	Connecticut	-1	Ohio	-1
Georgia	+1	N.Carolina	+1	Iowa	-1	Pennsylvania	-1
Oregon	+1			Kansas	-1		
Utah	+1			Massachusetts	-1		
Washington	+1			New Jersey	-1		

According to the Census Bureau projections, more congressional seats would shift among the states after the 1990 census than according to projections by the National Planning Association.
